I. Letter to Shareholders

Distinguished shareholders, ladies and gentleman:

Thank all the shareholders for your encouragement and support to CHIEFTEK PRECISION CO., LTD. (cpc for short). We will continue to operate steadily, be committed to developing key technology and improve product value. Hereby I will report with regard to the operating results of 2015 and operating plan of 2016.

I. Operating results of last year (2015)

(I) Results of operating plan in last year.

Comparison table of consolidated profit or loss of the company in the last two years is as follows:

1. Comparison table of consolidated profit or loss in the last two years

Unit: NT\$ in thousand

| | | | int: 1(1 φ in thousand |
|------------------------------|-----------|-----------|------------------------|
| Item | 2015 | 2014 | Increase (decrease) |
| Sales revenue | 1,021,983 | 1,016,920 | 5,063 |
| Operating costs | (715,579) | (776,000) | (60,421) |
| Operating margin | 306,404 | 240,920 | 65,484 |
| Operating expenses | (210,248) | (201,768) | 8,480 |
| Operating benefit | 96,156 | 39,152 | 57,004 |
| Net non-operating income and | (14,741) | (7,334) | (7,407) |
| expenses | | | |
| Profit (loss) before tax | 81,415 | 31,818 | 49,597 |
| Income tax (expense) benefit | (10,633) | (11,075) | 442 |
| Profit (loss) for the year | 70,782 | 20,743 | 50,039 |
| Other Comprehensive income | (6,296) | 9,574 | (15,870) |
| (loss) for the year | | | |
| Comprehensive income (loss) | 64,486 | 30,317 | 34,169 |
| for the year | | | |

The table above shows:

(1) Turnover

- A. In 2015, consolidated operating net profit is NT\$1,021,983 thousand. Compared with NT\$1,016,920 thousand of 2014, it is increased by NT\$5,063 thousand with growth ratio of 0.50%.
- B. In 2015, the global boom continues to decline, the price and production of manufacturing products of our country decline as well. Exports of mechanical equipment and machine tool have a negative growth. European and American markets are even, but Asian market recession is serious, especially China mainland market. Besides, NTD exchange depreciation of NTD against USD is far less than YEN and KRW, of which, YEN exchange depreciation is as much as 50% in the last three years. So Taiwanese corporate becomes less competitive. Under such extremely difficult environments and with joint efforts of the whole group, it is really not easy as **cpc** consolidated revenue of 2015 grows against trend compared with 2014. Compared by regions, China mainland region grows by 7.55%, European region grows by 8.12%(influenced by devaluation of euros, it decreases by 8.55% if converted to NTD), American region grows by 13.26%, Taiwan domestic sales declines by 18.09%, other regions grow by 10.51%, of which economy in China mainland region has declined sharply since the third season of 2015 and then influenced Taiwan.

(2) Surplus

- A. In 2015, consolidated operating gross profit is NT\$306,404 thousand. Compared with NT\$240,920 thousand of 2014, it is increased by NT\$65,484 thousand with growth ratio of 27.18%.
- B. In 2015, pre-tax earnings are NT\$81,415 thousand. Compared with NT\$31,818 thousand of 2014, it is increased by NT\$49,597 thousand with growth ratio of

155.88%. The reason is greatly increased revenue of major series of Linear motor, and high proportion of Miniature Linear Guide with high gross profit and effective de-stocking of consolidated inventory.

C. In 2015, earning per share (EPS) after tax is NT\$ 1.26.

(II) Situation of budget enforcement

Financial forecasting was not published in 2015, so there is no budget achievement.

(III) Analysis of financial revenue and expenditure and profitability

| , | | capellateare and pro- | | |
|------------------|--|-----------------------|--------|--------|
| | Item | 2015 | 2014 | |
| Financial | Ratio of liabilities | 42.03 | 48.30 | |
| structure (%) | Ratio of long-term property, factory a | 276.70 | 240.71 | |
| Debt | Current ratio | | 267.74 | 204.57 |
| paying ability | Quick ratio | 182.40 | 127.53 | |
| (%) | Interest coverage r | 5.45 | 2.64 | |
| | Return on assets (I | 3.60% | 1.43% | |
| | Return on equity (| 5.43% | 1.56% | |
| Profit structure | Ratio on paid-in | Operating profit | 16.23% | 6.61% |
| (%) | capital | Profit before tax | 13.74% | 5.37% |
| | Net profit ratio | 6.93% | 2.04% | |
| | Basic EPS (\$) | 1.26 | 0.35 | |

(IV) R&D situation

In 2015, the company inputs NT\$36,985 thousand as R&D expense. Compared with NT\$30,775 thousand of 2014, it is increased by NT\$6,210 thousand with growth ratio of 20.18%.

With Taiwan facing crossroad of shocks, we gradually move to soft power from hardware power. The five innovation plan put forward by the new government are green energy technology, biotechnology industry, Silicon Valley Asian, defense industry and wisdom machinery in which wisdom machinery is exactly the focus of cpc.

In the development of Linear Guide, to meet the demand of heavy load and high precision of machine tool, **cpc** actively devote to development of large heavy load and high rigidity linear guide and increase profit in improvement of process and design to cope with competitive market price. Besides, **cpc** also actively develop high technical products, such as Linear Guide in miniature size 1mm and 2mm, to meet the market needs of high precision and micro machine.

- 1. **cpc** starts from precision machinery (**cpc** all series of Miniature and Standard Linear Guide) and expands to Linear Motor, Driver and Sensor, with medium and long term goal of developing state-owned servo controller.
- 2. Through many years of R&D, it has developed TC series Linear Motor servo controller which is in a higher level than general servo motor and will step forward to all series of servo drivers including linear, rotary, AC/DC, servo controlling products from low power (400watts) to high power (2880 watts). It is expected to bring into market successively in 2016. As for position sensitive components, read head of magnetic encoder that has been developed is stepping forward to mass production stage.
- 3. The current linear encoder is mainly divided into optical scale and magnetic scale. Optical scale has a high absolute precision but with a relatively higher price. In some applications of point-to-point positioning, the price can be reduced by more than 1/2 if using magnetic scale with required precision. Reading head of magnetic scale owned by our own company is developed and tested at present.
- 4. Influenced by industry 4.0 driven by German, application concept and trend of wisdom automation and smart factory spread all over the world. Holding relevant information and trend of the global manufacturing industry and machinery market, cpc will devote to development of new products such as advanced mechanical

processing system. It will bring new business opportunity for company and industry with industry 4.0 plan.

II. Summary of operating plan in this year (2016)

(I) Management principles (Corporate social responsibility policy)

1. Implement information transparency, practice honest operation

- (1) Implement information transparency, practice good corporate governance.
- (2) Stick to honesty, integrity and sustainable operation, achieve **cpc** leading brand of the world.
- (3) Cultivate a filial team with mercy, international view, professional skills and high sense of honor.

2. Strengthen the awareness of environmental safety, implement environmental protection.

- (1) Strengthen the awareness of sustainable environmental safety and shape life community culture.
- (2) Provide high-quality and healthy environment and promote the harmonious relationship of the team.
- (3) Promote recycling and purification of resources, build an environment of energy conservation and waste reduction.

3. Education is morality-rooted, create a peaceful society.

- (1) Plant widely the Chinese cultural root and establish a righteous corporate.
- (2) Cultivate a team with morality and skills, become a model of corporate operation.
- (3) Fulfill corporate social responsibility, co-create a sunny and peaceful society.

(II) Expected sales volume and its basis

The company sets operating goals of the next year according to industry prosperity, economic environment and other factors, considering current operating situation of the company. With technology maintaining leading advantage continuously, the expected sales volume and amount should keep growing.

(III) Important production and marketing policies.

1. Marketing policy

- (1) Marketing with private brand **cpc** in the world.
- (2) Increase turnover of niche products.
- (3) Continuously enhance operating functions of each area.

2. Manufacturing policy

- (1) Build worldwide management mechanism and integrate group resources.
- (2) Improve productive efficiency and increase product competitiveness.

After years of efforts, consolidated inventory not only continues to decrease significantly and has reached a reasonable inventory level. The source of future revenue will mostly depend on the current operation, that is, with the improvement of turnover, capacity utilization rate will increase and product competitiveness should be higher and higher.

III. Company's future development strategy

- (I) **cpc** is based on establishing its own technology and developing its basic power, progressively providing the industry from major high-quality and competitive mechanical components(all series of Linear Guide), electric machine products (Linear Motor and Stage), to drive control components (driver, magnetic scale).
- (II) To provide products of all series Linear Guide, expecting mass production of Miniature Linear Guide in size 2mm and minimum 1mm which are mainly used in biomedical field.
- (III) To provide all size of Linear Motor and DD Motor.
- (IV) Machine tool innovation newly invested in coping industry 4.0 makes the whole processing technology and the process more flexible.
- (V) To devote to driver development which is in a higher level and has communicating functions in electronic control system is the foundation of building to independent electric control system technology. Our goal is driver controls and controller

intellectualizes, developing application products, such as robot.

(VI) Begin to expand our hands to the development of a new generation of processing machinery and equipment coordinating industry 4.0. **cpc** will devote actively and continuously to software and hardware in industry 4.0.

cpc wants to take its root in basic product-enabling technology and develop for a long term. It is our main direction at present to improve hardware products continuously and establish our own technology integrates electrics and mechanics.

IV. Influence of external competitive environment, regulatory environment and overall business environment

(I) External competitive environment

To cope with industrial dilemma, **cpc** positively promotes competitive products Miniature Linear Guide to improve market share. But with 50% depreciation of YEN exchange, not only Europe and neighboring Southeast Asia market place orders to Japan in turn, but also many large and medium-sized enterprises purchase from Japan instead of Taiwanese factory, leading to slow recovery of machinery and machine tool industry prosperity. With appreciation of YEN exchange recently, order-transferring effect will appear gradually. Also intelligent manufacturing has been the key of industry development. Therefore it is the best illustration of accelerated upgrading of machinery industry to establish **cpc** subsidiary in Germany in 2016 and cooperate with German technology for more development.

(II) Regulatory environment and overall business environment

Our corporate is little affected by regulatory environment for industrial properties. But in terms of the overall business environment, because Europe and some countries carry out quantitative easing and some countries stimulate prosperity by means of depreciation, the currency exchange rate changes a lot. Our corporate will continue to collect, analyze and take appropriate safety measures to cope with the situation.

Our corporate will still stick to "deep ploughing in technology field, expanding customers' service, positively carrying on innovations and R&D, accumulating patent resources". The long-term accumulated advantages, profound technology, manpower and capacity for R&D and innovation will expand integrity of products, provide customers with more complete services, and then achieve the best interests for shareholders and customers, create the best career welfare for all colleagues, return the public with virtuous and skilled achievements, bring along social goodness, make everyone safe and happy and satisfied with their work and life. It is worth it definitely.

Hereby I wish all the shareholders
In good health and have a happy family!

Chairman: CHEN LI-FEN

II. Company Profile

I. Date of establishment: October 19, 1998

II. Company History
(I) Company History

| | ny History |
|-------------|---|
| Year | Important historical evolution |
| 1998 | Approved by Ministry of Economic Affairs (MOEA) and set up corporate license with paid-in capital of NT\$5,000 thousand. |
| 1999 | Put forward "R&D plan of Miniature Linear Guide" and got project grants from Industrial Technology Research Institute. Applied for "Linear motion bearings" patent to Taiwan, America, Germany and Japan. Moved into incubation center of National Cheng Kung University and carry out Industry-University collaboration with National Cheng Kung University. Apply for increased capital by cash in October, paid-in capital was increased to NT\$25,000 thousand. |
| 2000 | Moved to Rende factory and began pilot mass production. Beginning of MR9M Miniature Linear Guide mass production. Apply for increased capital by cash in April, paid-in capital was increased to NT\$41,200 thousand. Apply for increased capital by cash in September, paid-in capital was increased to NT\$99,000 thousand. |
| 2001 | Made negotiations with agents and distributors on development of domestic clients and overseas clients in the USA, Germany, the UK, Italy, Benelux, Switzerland, Israel, Singapore, Malaysia and other countries. Entered Korean market and signed the contract with Korean agent. Establishment of factory in southern science industrial park was approved by National Science Council (NSC). "Linear motion bearings" was approved by American patent. Apply for increased capital by cash in July, paid-in capital was increased to NT\$150,000 thousand. |
| 2002 | Entered Singaporean market and signed the contract with Singaporean agent. Apply for increased capital by cash in July, paid-in capital was increased to NT\$210,000 thousand (Tech stock was NT\$60,000 thousand). |
| 2003 | Started building Phase I project of the factory in Southern Taiwan Science Park. Apply for increased capital by cash in August, paid-in capital was increased to NT\$270,000 thousand. Apply for increased capital by cash in October, paid-in capital was increased to NT\$290,000 thousand. Exhibited all series of Miniature Linear Guide in Shanghai in December. |
| 2004 | Beginning of Size3Miniature Linear Guide mass production. Apply for increased capital by cash in January, paid-in capital was increased to NT\$340,000 thousand. Apply for increased capital by cash in March, paid-in capital was increased to NT\$360,000 thousand. |
| 2005 | Factory in Southern Taiwan Science Park was completed and began official mass production. Official mass production of standard Linear Guide. |
| 2007 | Mass production of AR/HR Roller type Linear Guide. Passed the ISO9001 quality certification. Carried out university-industry collaboration with mechanical engineering department of National Chung Cheng University. Applied for "R&D subsidy to early design and development of linear motor" and |

| approved by Southern Taiwan Science Park Authority. Approved by the Ministry of National Defense and applied for personnel who serviced national defense, to cultivate R&D talents coordinating national policy. Beginning of Ultra-fast miniature linear guide mass production. Beginning of Self-lubricating miniature linear guide mass production. Set up cpc subsidiaries in the United States with paid-in-capital of US\$300 thousand. Set up cpc subsidiaries in Kunshan city with paid-in-capital of US\$300 thousand. Beginning of Ironless Series linear motor producing. Apply for increased capital by cash in December, paid-in capital was increased to NT\$360,560 thousand. Set up cpc subsidiaries in Germany with paid-in capital of EU\$69 thousand. cpc Kunshan applied for increased capital by cash, paid-in capital was increased to US\$1,000 thousand. Increased capital by surplus was NT\$18,028 thousand, paid-in capital was increased to NT\$378,588 thousand. Public issuance was approved on Jan. 17th and stocks were registered on the Emerging Stock Market on Mar. 10th. Increased capital by surplus was NT\$30,287 thousand, paid-in capital was increased to NT\$408,875 thousand. Apply for increased capital by cash in December, paid-in capital was increased to NT\$438,875 thousand. Purchased land of Tree Valley Park as future preparation for extension construction of plants. Employee stock warrant issued new shares of NT\$6,204 thousand paid-in capital was increased to NT\$44,0079 thousand. | | The company | All companies in the financial reports | The company | All companies in the financial reports | | |
| Board Director | 13.84% | 13.84% | 36.73% | 36.73% | | |
| Supervisor | 1.58% | 1.58% | 1.39% | 1.39% | | |
| General Manager and Vice-General Manager | 8.26% | 9.42% | 21.57% | 25.43% | | |

- 2. Relevance among remuneration payment policy, standard and combination, procedure of remuneration setting and business performance and future risk:
 - (1) Remuneration of board directors and supervisors of the company is propounded to the board of directors for reference of decision-making by the Compensation Committee after

- related meeting and discussion are made, and is negotiated and discussed by the board of directors based on the participation degree and contribution of board directors and supervisors for the company operation as well as the level in the same business.
- (2) Appointment, dismissal and remuneration of general manager and vice-general manager of the company are handled according to relevant regulations of the company, remuneration payment standard is submitted to the Compensation Committee for review by HR Department in accordance with related regulations of personnel performance evaluation in the company, individual performance, contribution degree for the entire company operation as well as the level in the same business, then sent to the board of directors, and finally executed after passed through discussion.
- (3) Remuneration policy of the company:
 - A: Personal ability, contribution degree for the company and performance are positively correlated with the business performance, and future risk are considered, controlled and managed, so the relevance between remuneration policy and future risk is relatively low.
 - B: Overall salary combination mainly includes fixed salary, short-term incentive reward (such as performance bonus and employee stock bonus) and long-term incentive compensation (such as employee stock option certificates and transfer of treasury stock to employees)

- (VII) If the company formulates the corporate governance code and relevant regulations, it shall disclose its inquiry mode:

On March 21, 2012, the corporate governance related specification was passed through the resolution of the board of directors, and the formulated "Code of Corporate Governance" was passed on May 9, 2014 through the resolution of the board of directors. The chairman room was responsible for "Promotion of Corporate Social Responsibility Unit" and "Promotion of Corporate Faithful Management Unit", and would regularly report the operation situation to the board of directors later. On March 26, 2015, the revision was passed through the resolution of the board of directors. Each internal control system of this company has included the corporate governance spirit, which will continuously promote the operation of corporate governance. This company has formulated the rules of procedure for the board of shareholders, the board of directors as well as the complete internal control system and internal audit system, etc., has implemented the operation and promotion of corporate governance, code of corporate governance and relevant regulations, and has released them on the company website (company website: http://www.chieftek.com) or public information observation station.

- (VIII) Other important information enough to promote the understanding of operation situation of corporate governance: This company will disclose significant information to the investment public according to law to promote the understanding of the company.
 - (IX) Internal control system performance situation
 - 1. Internal control statement

CHIEFTEK PRECISION CO., LTD.

Statement of Internal Control System

Date: March 17, 2016

The internal control system of this company in 2015 is hereby stated as follows according to the self-assessment results:

- I. This company acknowledges that to establish, implement and maintain the internal control system is the responsibility of the company's board of directors and manger, and this company has established such system. Its purpose is to provide reasonable assurance for reaching the goals of effective and efficient operation (including making profits, achieving performance and ensuring the safety of assets, etc.), reliable, timely, transparent guidance and conforming to relevant specification, namely relevant laws and regulations, etc.
- II. The internal control system has natural limits. No matter how perfect the design is, the effective internal control system can also provide reasonable assurance only for reaching the above three goals. Moreover, due to the change of environment and situation, the effectiveness of internal control system may also change. Only the internal control system of this company is set with the self-supervision mechanism, and once the negligence is identified, this company will take the corrective action.
- III. This company is basing on the judgment items for the effectiveness of internal control system stipulated by "Standard for Treatment of Establishment of Internal Control System of the Public Offering Company" (hereinafter referred to as "Standard for Treatment") to judge whether the design and implementation of the internal control system are effective. This internal control system judgment items adopted for "Standard for Treatment" are diving the internal control system into five components in accordance with the process of management control: 1. Control environment; 2. Risk assessment; 3. Control operation; 4. Information and communication; and 5. Supervision operation. Each component further includes several items. Please refer to the provisions of "Standard for Treatment" for the above items.
- IV. This company has adopted the above internal control system judgment items to assess the effectiveness of design and performance of the internal control system.
- V. Based on the assessment results of the preceding paragraph, this company considers the internal control system (including the supervision and management of subsidiaries) on December 31, 2015 includes understanding the goal realization degree of effective and efficient operation, and reporting the effective design and performance of internal control system that is reliable, timely, transparent, and conforming to the relevant specification, namely the relevant laws and regulations, which can reasonably ensure the realization of the above goals.
- VI. This statement will become main contents of annual report and public instruction book of this company, and will be opened to the public. If the above disclosed contents have any hypocrisy, concealment and other illegal matter, the legal liability of Article 20, Article 32, Article 171 and Article 174, etc. in the Securities Exchange Act will be involved.
- VII. This statement had been passed on March 17, 2016 by the board of directors of this company. Among 7 attending directors, no one objects; all of them agree the content of this statement, and hereby state.

CHIEFTEK PRECISION CO., LTD.

Chairman: CHEN LI-FEN

General Manager: HSU MING-CHE

- 2. If the accountant is entrusted for project review of internal control system, the accountant review report shall be disclosed: None.
- (X) From the nearest year to the print date of annual report, circumstances of the company and internal personnel being punished according to law, and the company's punishment, main negligence and improvement for the internal personnel who violate the internal control system:
 - 1. From the year of 2015 to the print date of annual report, the company and internal personnel have no punishment case due to major violation of the provisions of internal control system.
 - 2. In addition to strengthening the personnel education and training, this company requests the internal audit personnel to check at any time to reduce the occurrence of negligence.
- (XI) From the nearest year to the print date of annual report, important resolutions of the board of shareholders and the board of directors:

| CHEN KU-HAO | 724,626 | 1.22% | | |

(VI) Market price, net value, surplus, dividend of each share and relevant data in recent two years

| Year Item | | | | 2014 | 2015 | Current year to May 16, 2016 | |
|-----------------------|---|------------------------------------|--------------------|--------|----------|---------------------------------|----------------|
| Market | Highest | | | 64.30 | 43.90 | 36.80 | |
| price of each share | Lowest | | | 28.25 | 21.60 | 24.35 | |
| (Note 1) | Average | | | 53.22 | 30.26 | 31.27 | |
| Net value of | Before distribution | | | | 21.75 | 22.28 | 22.57 |
| each share (Note 2) | After distribution | | | 21.28 | (Note 9) | Not applicable | |
| G 1 C | Weight | ed averag | e number of shares | | 58,852 | 56,244 | 56,234 |
| Surplus of each share | Surplus of each share (Note 3) | | Before adjustment | | 0.35 | 1.26 | 0.35 |
| | | | After adjustment | | 0.34 | (Note 9) | Not applicable |
| | Cash dividend | | | 0.50 | (Note 9) | Not applicable | |
| Dividend of | | Rationed | shares of surplus | | 0 | (Note 9) | Not applicable |
| each share | | Rationed shares of capital reserve | | 0 | (Note 9) | Not applicable | |
| | Cumulative unpaid dividend (Note 4) | | | 0 | 0 | 0 | |
| Analysis of | Price-earning ratio(Note 5) | | | 130.71 | 25.72 | 19.65 | |
| investment | Price-dividend ratio (Note 6) | | | 91.50 | 64.81 | Not applicable | |
| | Yield to maturity of cash dividend (Note 7) | | | 1.09% | 1.54% | Not applicable | |

^{*} In case of the allotment of shares through transfer of surplus or capital reserve to increase the capital, the market price and cash dividend information of the issued shares retroactively adjusted shall be disclosed.

- Note 1: List the highest and lowest market price of common stock of each year, and calculate the average market price of each year according to the trading value and trading volume of each year.
- Note 2: Please fill in based on the number of shares issued at the end of the year and the resolution of distribution of the board of shareholders in next year.
- Note 3: If the retroactive adjustment is required due to stock grants, etc., the surplus of each share before and after adjustment shall be listed.
- Note 4: If the issuance condition of equity securities requests the unissued dividend of that year should be accumulated to the issuance of surplus year, the cumulative unissued dividend by the end of current year shall be respectively disclosed.
- Note 5: Price-earning ratio=Average closing price of each share of current year / Surplus of each share.
- Note 6: Price-dividend ratio=Average closing price of each share of current year / Cash dividend of each share.
- Note 7: Yield to maturity of cash dividend=Cash dividend of each share / Average closing price of each share of current year.
- Note 8: The net value of each share, surplus of each share shall be filled in with the data checked (checked and approved) by the accountant in the nearest quarter by the end of print date of annual report, while the rest of field shall be filled in with the data of current year by the end of print date of annual report.
- Note 9: 2015 surplus distribution scheme has not been passed by the general meeting of shareholders of 2016.

(VII) Dividend policy and performance situation of the company

1. Dividend policy:

The general final accounts of current year of this company shall be distributed according to the following order in case of surplus:

- I. Pay duties and taxes.
- II. Cover the deficit.
- III. Withdraw 10% as the statutory surplus reserve.
- IV. If necessary, withdraw or transfer back the special surplus reserve in accordance with the provisions of laws or competent authorities.
- V. For the balance after deduction of the amount withdrawn from the above Paragraph I to paragraph IV, as well as the undistributed surplus of the previous years, the board of directors shall draft a distribution proposal, and submit it to the board of shareholders to decide whether to distribute the shareholder dividend or reserve it, but the dividend distribution amount shall not be lower than 20% of the remaining amount after deduction of the profit of current year according to the provisions of Paragraph I to paragraph IV.

In order to continuously expand the operation scale, enhance the competitive strength, and cooperate with the company's long-term business development, future fund demand and long-term financial planning, the dividend distribution policy shall give priority to stock dividend and collocation of part of the cash dividend. The cash dividend distribution sum shall not be lower than 10% of the sum of shareholder dividend to be distributed.

2. Performance situation:

This company's 2015 surplus distribution scheme had been passed by the resolution of the board of directors on March 17, 2016. Please refer to the following table for 2015 surplus distribution table.

CHIEFTEK PRECISION CO., LTD.

Surplus distribution table 2015 of the Republic of China

Unit: NT\$ in thousand

| | A a | | |
|--|---------------------------|----------------|--|
| Item | Amount | | |
| 110111 | Subtotal | Total | |
| Undistributed surplus balance at the beginning of the period | | \$ 245,203,924 | |
| Decrease: Confirmation of actuarial losses of benefit plan | | (3,151,636) | |
| Reserved surplus at the beginning of the period after | | 242,052,288 | |
| adjustment | | | |
| Distributable surplus available of this year | | | |
| Current net income after tax | 70,782,532 | | |
| Decrease: Drawing of 10% statutory surplus reserve | $(\underline{7,078,253})$ | | |
| Distributable surplus of this year | | 63,704,279 | |
| Cumulative distributable surplus | | 305,756,567 | |
| Listed allotment of this year | | | |
| Shareholder dividend-Cash (distribution of NT\$ 0.5 for each share) | (28,116,900) | | |
| Shareholder dividend-Stock (distribution of NT\$ 0.5 for each share) | (<u>28,116,900</u>) | | |
| Subtotal of distributed amount | | (56,233,800) | |
| Undistributed surplus balance | | \$ 249,522,767 | |
| | | 1 | |

Notes:

- 1. The surplus distribution for this time will give priority to distribution of 2015 surplus.
- 2. The cash dividend shall be calculated according to the shareholding ratio of shareholders recorded in the shareholders ledger on the dividend distribution base date, until distributed to NT\$1 (neglecting all those less than NT\$1). After the above dividend distribution is passed by the general meeting of shareholders, the board of directors shall be authorized to further arrange the dividend distribution base date and designate special persons for handling all the cash dividend of less than NT\$1.
- (VIII) Effects of the stock grants proposed by the board of shareholders for this time on the company's business performance and surplus of each share:

The resolution of the board of directors of this company passed 2015 surplus distribution scheme on March 17, 2016, the capital increase by transferring of surplus was NT\$28,116,900 (distribution of 50 shares for every 1,000 shares), and the paid-in capital amount after the capital increase was NT\$620,454,890. In 2015, the surplus of each share was NT\$1.26, and the surplus of each share after the retroactive adjustment was NT\$1.20, with the dilution ratio of about 4.76%. In addition, the future operation of this company will still continue to grow. Therefore, on the whole, the distribution of stock grants in 2015 should have no significant effect on the company's business performance and surplus of each share.

- (IX) Remuneration of employees, directors and supervisors:
 - 1. Percentage or range of remuneration of employees, directors and supervisors specified in the articles of association:

In accordance with the articles of association of this company, during the distribution of surplus, the remuneration of directors and supervisors should not be more than 3%, and the employee bonus shall be 3%-8%. However, in response to the provisions of the revised company law on May 20, 2015, this company had passed the amendment to the articles of association through the board of directors on August 6, 2015. According to the provisions of the revised articles of association, this company should distribute 3%-8% of profit of current year to reward employees, and should distribute no more than 3% of profit of current year to reward directors and supervisors. But when the company has accumulated loss, it should be covered. The employee remuneration should be distributed in cash or stock, and those who are distributed with cash or stock should meet certain conditions of being affiliated to the company employees. These certain condition should be formulated by the board of directors.

The amendment to the articles of association will be submitted to the general meeting of shareholders of 2016.

2. Accounting treatment on difference between the estimation basis for estimation of remuneration amount of employees, directors and supervisors, shares calculation basis for employee remuneration distributed in stock, actually distributed amount, and the estimated amount of current period:

In accordance with the provisions of (2007) JM Zi No. 052 Letter released by Accounting Research and Development Foundation of the Republic of China in July 2007, this company should take the employee bonus, remuneration of directors, supervisors as the expenses, instead of surplus distribution. For the remuneration of directors, supervisors and employee bonus of current period, if the actually distributed amount through the resolution of the board of shareholders differs from the estimated amount, it will be regarded as changes in accounting estimate, and listed as the profit and loss of 2016. The surplus of each share of 2015 has fully reflected the effects of employee bonus, remuneration of directors, supervisors on profit-making, thus this will not affect the estimated calculation of surplus of each share.

- 3. Circumstance of passing the remuneration distribution by the board of directors:
 - (1) Employee remuneration and remuneration amount of directors, supervisors distributed in cash or stock: In case of difference with the annual estimated amount of recognized expenses, the difference amount, reason and treatment shall be disclosed:

This company passed the employee remuneration of NT\$6,850,448, and the remuneration amount of directors, supervisors of NT\$2,568,918 through the resolution of the board of directors on March 17, 2016. Such remuneration should be distributed in cash, and same with the annual estimated amount of recognized expenses.

- (2) Amount of employee remuneration distributed in stock and proportion occupied in sum of individual or individual financial reporting profit (loss) for the year and total amount of employee remuneration of current period: The cash method is adopted for this time, therefore it is not applicable.
- 4. Circumstance of actual distribution of remuneration of employees, directors and supervisors of the previous year (including the number of shares distributed, amount and share price), any difference with the recognized remuneration of employees, directors and supervisors, and detailed description of different amount, reason and treatment.
 - (1) The employee bonus actually distributed by this company in 2014 was NT\$1,504,100.
 - (2) The remuneration of directors and supervisors actually distributed by this company in 2014 was NT\$564 thousand.
 - (3) The original board of directors passed the employee bonus, remuneration of directors and supervisors of 2014, and such remuneration was distributed to employees, directors and supervisors in 2015; meanwhile, the proposed distribution amount passed by the original board of directors was same with the actually distributed amount.

(X) Circumstance of repurchase of this company's shares:

| Repurchase time | First time (period) |
|--|---|
| Repurchase purpose | Transfer shares to employees. |
| Repurchase period | From November 12, 2014 to January 9, 2015 |
| Price range of repurchase | NT\$22.30 to NT\$50.40 for each share |
| Class and quantity of repurchased shares | Common stock of 3,000,000 shares |
| Amount of repurchased shares | NT\$118,543,503 |
| Quantity of shares having already been handled with elimination and transfer | 0 |
| Quantity of shares of this company cumulatively held | Common stock of 3,000,000 shares |
| Ratio (%) of quantity of shares of this company cumulatively held in total shares issued | 5.06% |

- II. Corporate bonds handling circumstance: None.
- III. Special stock handling circumstance: None.
- IV. Handling circumstance of Global Depositary Receipts (GDR): None.
- V. Employee subscription right voucher and circumstance of restriction on handling the employee right offering:
- (I) Circumstance of handling the company's unexpired employee subscription right voucher: None.
- (II) Accumulated to the print date of annual report, name, obtaining and subscription circumstance of the manager who obtains the employee subscription right voucher and the employee who obtains the voucher, and can subscribe top 10 shares: None.
- (III) Circumstance of handling the private employee subscription right voucher in recent three years: None.
- (IV) Circumstance of restriction on handling the employee right offering in the nearest year to the print date of annual report: None.

VI. Circumstance of handling of new issue of shares with merger or assignee of other corporate stock: None.

VII. Funds application plan performance circumstance:

This company has no issuance or private placement of negotiable security in the previous times that has not been completed or has been completed in the recent three years and the planned benefit has not been shown.

V. Operational Highlights

- I. Business content
- (I) Business scope:
 - 1. Business scope:
 - (1) Main content of the operating business:

CB01990 other mechanical manufacturing industry.

F401010 international trade.

Research, develop, manufacture and sell the following products:

- A. Miniature and standard type linear guide
- B. Miniature and standard type linear module
- C. Photovoltaic and semiconductor process equipment
- D. Concurrently engaged in international trade related to the above products
- (2) Business proportion:

Unit: NT\$ in thousand

| Product name | 2014 | | 2015 | | |
|----------------|-----------|---------|-----------|---------|--|
| 1 Toduct Haine | Amount | % | Amount | % | |
| Linear guide | 1,009,262 | 99.25% | 984,741 | 96.36% | |
| Linear motor | 7,658 | 0.75% | 37,242 | 3.64% | |
| Total | 1,016,920 | 100.00% | 1,021,983 | 100.00% | |

- (3) Commodity (service) items of the company at present:
 - A. All series linear guide
 - B. All series linear motor
 - C. Linear motor servo driver
 - D. Linear motor module and subsystem
 - E. Linear motor cartesian coordinate robot
 - F. Driver software function upgrade
- (4) New commodity (service) items planning to be developed:
 - A.DD Motor
 - B. Water-cooled linear motor
 - C.20A linear motor driver
 - D. Magnetic scale sensing component
 - E. Miro size of 2mm and 1mm linear guide
- 2. Industry introduction
 - (1) Current situation and development of the industry

Due to the increasingly fierce market competition, especially the mainland market that has become the world factory, it takes low price product as the orientation, making the world's manufacturing industry speed up to low production cost, and the production manpower, production manufacturing speed, new product development speed must be constantly improved. Therefore, the automation of production equipment, numerical control (CNC/NC) and factory automation (FA) have become the goal constantly input and improved for all manufacturing industries today. Now the concept of industry 4.0 must be specific, and the industrial automation shall integrate the existing revolutionary information industry. "Precision", "Speed / Efficiency", "Reliability / Quality", "Durability / Service Life", "Micromation / Multifunction", "Flexibility / Diversity" and "Energy Saving/ Environmental Protection" are the most important requirements of automation and the goals needing to be constantly improved. While the information era puts emphasis on "Big Data Integration", "Information Processing / Communication / Transmission / Confidentiality...", "Remote Control", "AI Intelligence", which can improve the industry to a higher level. Therefore, the electromechanical control technology will be further added with information intelligence; the innovative development of electromechanical component and

high-value / precision / information intelligence will also become very important factors.

The mechanical actuation required for all production equipment and factory automation (FA) includes rotational motion and linear motion. Main electromechanical components include:

A. Motor components: Motor (electric generator class)

The motor has a very wide range of types, which is closely related to our daily life, such as consumer products of 3C and electrical appliances, industrial products of motor vehicles, aerospace, medial, electronic, electric, automatic tools, machines and equipment, etc. that are absolutely necessary.

It can be roughly divided into induction motor, step motor, servo motor, linear motor and even micro motor according to the type, with the power varying from mini Watt to mega Watt.

The advantages and disadvantages of motor performance can be judged from: 1. Motor constant (specific value of power / heating); 2. Power density (specific value of power / volume); insulating property, waterproofness, durability, reliability, etc.

B. Control components

Such components include frequency converter, driver, controller (shaft clip), PLC and other accessories, such as communication adapter card, security system module, power supply, relay, switch, wire and cable, etc.

C. Sensing components

There are such components like human's nerve, including encoder, optical scale, image recognition, accelerometer, gyroscope, strain gauge and other components known very well, and there are all other components that can sense the information of different source, and analyze, conclude it into available signal. With the development of technology, the innovation of this aspect quickly changes at a tremendous pace and is limitless.

D. Mechanical components:

Bearing guidance components: Bearing, linear guide.

Power transmission components: Gear, rack, belt, oil and gas pressure cylinder, ball screw.

There are many other components of different properties, such as locking joint, leak-proof, braking, spring, etc.

The range of products of this company at present concentrates on high additive value. The linear motion products with relatively new technology include linear guide, linear motor, linear motor servo driver, linear motor module, customized linear motor mechanical and electrical system, etc., with its industry introduction as follows:

a. Linear guide

The linear guide is a low friction component that takes the linear motion rolling bearing and guidance as the purpose. The characteristics of the linear guide superiority lie in high load capacity, high service life, high precision, high rigidity, high speed, low friction resistance, small energy consumption, small space, standardization, and low cost.

In the linear motion, the linear guide is main component for load bearing and linear guidance. As the industry has increasing requirements for yield rate, speed and space application, etc., the linear guide must have high load capacity, high service life, high rigidity, high precision, high speed, low friction resistance, small energy consumption, small space, standardization, low cost and other conditions to meet the industry requirements.

The linear guide can be divided into the following according to different rolling elements:

- Ball type linear guide
- Roller type linear guide

According to the size, it can be divided into:

- Miniature type linear guide (size of 1, 2, 3, 5, 7, 9, 12, 15)
- Standard type linear guide (size of 15, 20, 25, 30, 35, 45, 55, 65)
- Ultra-large type linear guide (size of 85, 100, 125)
- Wide type linear guide (size of 17, 21, 27, 35)

In different areas, and according to different industry types, the linear guide is widely used in the straight-line motion mechanism of precision machinery and equipment, automation equipment, medical instrument, food and aerospace science and technology equipment, etc. Because of the rapid development of mobile phone, tablet personal computer and other handheld type 3C products, the application of its main manufacturing equipment and non-standard automation equipment is continuously increasing, and the requirement for precision and efficiency, etc. of equipment is also relatively increasing. In addition, with the progress of medical technology and other precision equipment, the application of micro machinery is also relatively increasing, and the space application and precision of miniature type linear guide in space also become relatively important. Therefore, the linear guide has a significant impact on precision, efficiency, quality and cost, etc. of equipment and product manufacturing.

As the linear guide is applied to all mechanical equipment needing the linear actuation, each manufacturing industry belongs to the application range, which is classified as follows according to the characteristics:

- High precision requirement: Toolroom machine, measuring instrument, semiconductor equipment.
- High speed requirement: Automation machinery and equipment, toolroom machine, electronic industry machinery, packaging and printing equipment, optoelectronics industry.
- High load requirement: Large-scale toolroom machine, shock absorption system.
- High rigidity requirement: Toolroom machine.
- Miniaturization requirement: Semiconductor equipment, electronic machinery, biotechnology, medical equipment, optoelectronics industry.
- Low noise requirement: Semiconductor equipment, electronic machinery, mechanical arm, measuring instrument.
- Low cost requirement: General industry, mechanical arm, handling machinery. Those belonging to the bulk include the toolroom machine industry, automation industry, semiconductor packaging equipment, LCD panel and solar cell process equipment, electronic machine, testing and measuring equipment, biomedical instrument, handling equipment, printing machine, wood-working machine, etc.

Nowadays, the world still has low prosperity. In the face of strong competition of red supply chain, only when they continuously improve their own technology threshold, integrate the experience and software strength can they survive in the market. On the marketing strategy, the application level needs to be expanded, and the method of industry cooperation should be adopted for strategic alliance with the peripheral industry to avoid becoming the victim of top-heavy trend under the industry 4.0.

At present, the core application products developed by this company include the linear guide, linear motor and linear motor module. The linear guide manufactured by CHIEFTEK PRECISION has had quite visibility and market share in the market of international linear motion components; especially for the miniature linear guide, the miniature linear guide with the size of 2mm has been measured, with the technology superior to the industry. Later, the high thrust density linear motor products developed by the dominant plan benefits of Ministry of Economic Affairs have also

gradually won the popularity in the market, and improved the company's revenue.

CHIEFTEK PRECISION adopts the research and development and mass production technology of such high precision products of linear guide and linear motor, and integrates the linear guide, linear motor, linear encoder and other structural parts as a complete linear motor module to be provided to the user. In other words, CHIEFTEK PRECISION cannot just simply provide key components, but also can provide technical support in the manner of total solution for the customers, which thus can make the customers avoid being unfamiliar with the use in the preliminary stage, can expand the company's scope of business areas, and even can meet the customized application requirement of the users by using the company's accumulated precise machinery technology through the ages.

b. Linear motor

Due to the direct drive system, the linear motor is favored by the equipment manufacturers who have high capacity, high precision requirements, and the market acceptance also becomes increasingly high. Although the overall linear motor module is gradually traded in the market, many other experienced customers choose components for self-assembly; both ironcore series and ironless series have their respective suitable market. For example, as the ironless series has no cogging force, it has smooth speed ripple, and is especially suitable for application of scanning. As the suction between mobile stator is 0, the mechanism volume can be shorten to save space; while the ironcore series has the advantage of high thrust density, it is suitable for using in the occasion of point-to-point motion.

c. Linear motor servo driver

With the arrival of industry 4.0, the demand for industry 3.0 is increasing greatly. The industry 3.0 mainly lies in the capacity of industrial automation, and with low prosperity of the world, the demand of domestic equipment manufacturers for localized components increases rapidly. CHIEFTEK PRECISION has always been a manufacturer of key components of precision machinery in the internal market; for example, linear guide, linear motor, linear motor module and even industrial robot are all independently developed and manufactured. In the aspect of drive control technology, for the linear motor driver, there is almost no completely independently developed product in the domestic, and most of them are matched with the system of Europe and the United States, causing the price competitiveness decreases significantly, and the independent technology is restricted. From the perspective of practical experience, when the marketing strategy of matching with the European driver is adopted, the existing linear motor market development generally concentrates on the sale of complete system, thus the biggest advantage is that the customer can maintain the fixed technology window, but may be also easily closed by the technology like Japanese brands to implement the price bundling, which may reduce the competitiveness on the contrary.

The main key components of industrial robot used in the industry include linear motor, linear guide, base, optical scale and driver. In order to cope with the demand brought by the industry 4.0 and industrial robot, the total solution for the customers' independent matching of each key component and the overall mechanical and electrical integration shall be provided.

CHIEFTEK PRECISION will develop the linear motor driver truly meeting the market demand with many years' experience in mechanical and electrical integration. Such driver can not only match with the linear motor module produced by CHIEFTEK, but also can freely match with the linear motor, linear guide and optical scale (as shown in the following figure) sold in the market. In addition, by using the existing sales channel, CHIEFTEK PRECISION has established the driver brand of proprietary technology in the domestic.

Open type driver component matching mode

d. Linear motor cartesian coordinate robot

For the composition of linear positioning stage of the cartesian coordinate robot, the linear motor does not need other transmission components. The coordinate robot of direct drive has more and more trend, and the improvement of speed, precision and reliability, etc. performance makes the direct drive robot become absolutely necessary in the high-technology industry automation area of semiconductor, electronics, panel and solar energy, etc.

e. Driver software function upgrade

In recent years, the high precision, high speed automation industry is growing year by year. In addition to the high reliability driver provided by the original closed system integration manufacturer, the open type and high compatibility linear motor driver begins to appear because the price stays at a high level. Its development trend is as follows:

- (a) Simple setting and easy operation: The additional auxiliary function is added to improve the system stability, precision and application range.
- (b) Data capture and analysis function.
- (c)Gain scheduling function.
- (d) Motion complied language.
- (e) High-speed network communication interface.
- (f) Anti cogging compensation function.

(2)Relevance of industry upstream, midstream, downstream

Upstream industry: Raw material supply: Alloy steel / Stainless steel / Copper wire / Magnet.

Processing industry: Cold drawing, forging, heat treatment, precision cutting processing, PCB panel layout processing, SMT assembly.

Material supply: Precision ball, roller, precision injection molded parts, electronic component (IC component, passive component).

Midstream industry: Manufacturing of linear motion components.

Linear guide, ball screw, linear motor, linear module / stage. Supporting cooperation industry: Mould designing and manufacturing, special processing machine.

Precision spindle, high frequency spindle, controller, driver.

Downstream industry: Toolroom machine industry, automation industry, semiconductor industry.

LCD panel and solar cell industry, electronic industry.

Medical and biotechnology industry, optical instrument industry.

Aerospace and defense industry, general machinery industry.

3. Each development trend and competition circumstance of products

(1) Product development trend

The linear motion products include the development trend of linear guide, linear motor, ball screw, linear module / stage, etc. According to the perspective opinions and development policies of professional research institutes, benchmarking enterprises at home and abroad, to scan the global major topics from the aspects of society, technology, economy, environment and policy, several items affecting the major trend of industry development can be summarized. In the social aspect, although the world's population is still growing in the future, the population structure acceleration develops towards the low birth rate, which causes the labor cost rise or manpower shortage, and gradually increases of the demand of automation equipment. In addition, people's life and living standard are continuously improved; the consumption patterns become more diversified; the market board also produces obvious changes; the proportion of traditional field of toolroom machine, electronic equipment, etc. adherent for linear transmission gradually declines; the medical, biotechnological, food and new energy equipment becomes the focus competed and pursued by the manufacturer; the properties of products change from putting emphasis on high load, high precision, high efficiency, high speed in the past to putting emphasis on energy saving, intelligent and humanization. The green sustainable concept is gradually implemented in different levels of the society, the consumers and producers actively rethink the allocation and application of resources. In addition to putting emphasis on increase of basic energy efficiency, the linear transmission products also put emphasis on environmental protection and energy saving, intelligent design innovation. The manufacturers' constantly updating of environmental protection and energy saving products has also become an important topic.

Taiwan is one of the preferred choice of manufacturing and processing of OEM/ODM in the whole world. The domestic manufacturers not only reduce the cost and impact of the external environment change through the process improvement and acceleration of overseas investment, but also invest more factory automation by virtue of the strength of upstream, downstream manufacturers to provide competitiveness! The soft power of Taiwan manufacturers gradually transforms from toolroom machine, photoelectricity, semiconductor to new energy and other industrial machinery, even the field of cars and electronic consumption products. In the long term, the application area of linear transmission mechanical and electrical products will tend to be diversified, which is also important and key for the development and survival of domestic manufacturers. With the constant expansion of the emerging application areas, and continuous improvement of the performance, thus the application range will be also continuously expanded.

In addition, the robot is mainly divided into the industrial robot and service robot. The production of global industrial robot in 2013 at least exceeded 150,000 sets. According to the estimation of IFR (International Federation of Robotics), the production of global industrial robot in 2014 exceeded 200,000 sets. To 2017, the global industrial robot market will grow to exceed 280,000 sets, and the research institute Freedoniau also estimated that the global market demand of industrial robot in 2021 may reach 15 billion dollars, and the linear motor system may occupy about 5-10%. Figure I is the industrial robot industry chain. CHIEFTEK PRECISION has stepped the technical field into the linear motor and driver in the drive module, which has great international competitiveness.

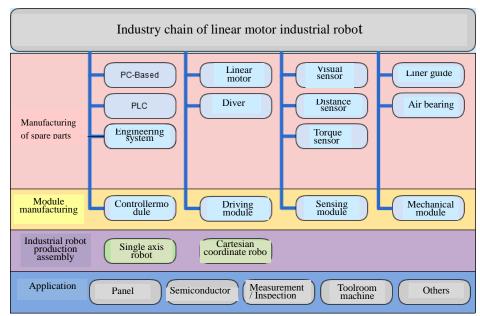

Figure I: Industrial robot industry supply chain

(2) Competition circumstance

A. Linear guide

The world's first largest linear guide company is Japan's THK, and the second is Germany's Bosch Rexroth, then Schaeffler, HIWIN, IKO, PMI, Schneeberger, cpc, NB, etc. The quality leaders are mainly THK, Bosch Rexroth, INA, then IKO, Schneeberger, cpc.; while the price leaders are HIWIN, PMI, TBI, etc.

When the linear guide manufacturers continuously increase the company establishment in the mainland with some large factories, in addition to the quality, the price competition is also increasingly fierce. cpc has actively put into development of large-scale high load and high rigidity linear guide, and improved the process and design to increase profits. Meanwhile, in response to the fiercely competitive market price, it has also actively developed the high-tech products, such as the linear guide with the miniature size of 1mm and 2mm, to provide the market demand of high precision and micro machine.

B. Linear motor

The main suppliers of linear motor include high popularity established companies of Parker, Technotion, Siemens, Anorald, Etel, Fanuc, Yaskawa, etc. of Europe, the United States and Japan, and new manufacturers of Akribis, HIWIN, PBA, cpc, etc. For the above well-known companies, except the linear motor that mainly adopts the high level control drive system, the high level complex system application occasion is mainly adopted, belonging to high unit price products; while the new manufacturers mainly adopt the middle and low level application occasion, though mainly belonging to low price simple type application occasion, with the development of factory automation, the market demand is big and grows continuously. The linear motor products of this company at present all have been mature, and to meet the market demand, the linear motor with the world's highest efficiency has been developed. Meanwhile, this company actively cultivates the electric control personnel for mechanical and electrical integration. After all, the terminal customers most care about the motor performance shown by the real machine. At present, this company has matched with its own or cooperated with the driver and optical scale manufacturer of other brands to provide customers with the choice of selling the whole system, and to meet the customers' application demand with a precise machine debugging and after-sales service.

C. Linear motor cartesian coordinate robot

The linear motor industrial robot system may have different mechanism design according to the customers' actual demand, which can have good dynamic characteristics of high precision and high speed for whatever design. At present, most of the domestic still gives priority to foreign manufacturers. Because the establishment of a linear motor system not only needs the cooperation of drive control, but also needs to be done well from the most basic components. At present, CHIEFTEK PRECISION has grasped the manufacturing and development of key components. With profound foundation of mechanical background, the robot manufactured has high reliability, and matched with the independently developed linear motor driver, it has both soft power and hardware power, which is recognized by the market since its introduction.

D. Linear motor servo driver

| Item | CHIEFTEK | Manufacturer | Manufacturer | Manufacturer |
|--------------------------|----------------|--------------|--------------|----------------|
| | PRECISION | A | В | C |
| Tashnalagy source | Proprietary | Proprietary | Merger | Proprietary / |
| Technology source | technology | technology | | OEM |
| Main field | Linear / | Rotation / | Linear / | Rotation / |
| Main field | Rotation | Linear | Rotation | Linear |
| Main application | Trajectory / | Point-to | Trajectory | Trajectory/ |
| Main application | Point-to point | point | | Point-to point |
| Auto tunning | Yes | Incomplete | Yes | Incomplete |
| Error compensation | Yes | No | Yes | No |
| EtherCAT | Yes | Yes | Yes | Yes |
| Cogging compensation | Yes | No | No | No |
| Innovative control mode | Yes | No | No | Yes |
| Simulationresegmentation | Yes | Yes | Yes | Yes |
| Internal control | Complete | Incomplete | Complete | Incomplete |

From the table, we can know that the linear motor driver developed by CHIEFTEK PRECISION has more complete technology in the function than other company brands in the domestic.

Although to some extent, we need to make efforts to catch up compared with foreign products, CHIEFTEK PRECISION has a great advantage in the price compared with foreign products. At present, the current product supply market has the product characteristic of higher cost performance. It will develop the higher level drive products in the future by using the industry-academy cooperation, and its own practical experience in linear motor.

(III) Technology and research and development situation

1. Technological level and research and development of the operated business
In addition to maintaining the sales of linear guide, linear motor, **cpc** also increases the linear motor servo driver in the aspect of linear motion components to expand the market territory, and it integrates its own products to provide customers with CLS linear motor module and customized linear motor module, stage, subsystem, which has formally stepped in the large market for mechanical and electrical integration.

As a professional manufacturer of linear motion mechanical and electronic components, **cpc** has obtained several invention patents for its products of Taiwan, Mainland China, Germany, the United States and Japan.

The linear guide products have complete sizes, from size 3(2W) to size 55, all in the range of mass production. Among them, the ball type products are included. Now **cpc** is carrying on the mass production of roller type products, ultra-long, ultra-short,

wide type products step by step. The products produced take the realization of best function in the same industry as the goal. In the aspect of load capacity, high-speed operation, low-noise design, self-lubrication design, retaining chain design and miniaturization design, cpc has also reached the above goals.

The linear motor **cpc** all series ironless and ironcore series linear motor thrust range is estimated of 10N-2,000N. In addition, the thrust range of products is also expanded to 5,000N (10,000N) recently to meet the demand of toolroom machine market. In order to step in the whole market of industrial components, **cpc** is actively setting about the development of direct drive motor, and takes the industrial torque grade demand range as the primary development specification and goal to respond to the increasingly diverse market demand application of client, thus to become one of the world's important manufacturers of the linear motor.

In order to make the products have ground-breaking technology threshold, the independently developed driver of **cpc** should be matched with to provide customers with a complete mechanical and electrical system, thus to meet the customers of different stages to expand the market scope. The research and development in the main technology level is as follows:

(1) Simple setting and easy operation:

When the current linear motor driver on the market needs to be matched with the labeled linear motor, the motor parameters (resistance, inductance, etc.) must be input manually to calculate the gain value of current loop, while the driver of CHIEFTEK PRECISION will use the technology of automatic system identification, and match with the actual detection response to gain the best control gain of each loop. Moreover, the correct position of Hall component and zero degree angle can be automatically detected without needing to input the electrical angle data to achieve the minimum parameter input as the design goal, thus to avoid human's negligence of the establishment of intelligent drive system.

(2) Adding the additional auxiliary function to improve the system stability, precision and application scope:

The driver of CHIEFTEK PRECISION allows the customers to add the band elimination and low pass filter aiming at the specific bandwidth on the mechanism. Therefore, when the user can't strengthen the rigidity of the mechanism itself, he may use the additional function of driver to suppress the system vibration. Generally speaking, the precision is divided into repeated accuracy and positional accuracy two types, which is directly related to processing and assembly accuracy of each component of the stage. For the most strict positional accuracy, it is the comprehensive result of machining accuracy of mechanism parts, straightness and flatness of guide, resolution ratio of optical scale, etc. The user may use the controller for error compensation to maintain the positional accuracy of the whole system for most of the time. However, the driver of CHIEFTEK PRECISION transplants the compensation function of the previous controllers to the driver, making the user can easily and directly carry on the error compensation of precision on the driver. Meanwhile, in addition to linear motion control, the driver application shall also be able to support the step motor and servo motor and other rotating system, such as the mechanic arm composed of multiaxial servo motor.

(3) Data capture and analysis function:

When the driver is in the process of operation, the system dynamic data of the system always needs to be monitored, such as following error, current, voltage and speed, etc. In addition to the general method of display of data on the interface after the capture waiting time, the driver of CHIEFTEK PRECISION also has the function of continuous recording, which can make the use have a real-time understanding of the whole system dynamic, and it contains the

standard deviation calculation, mean value calculation, Fourier transformation and other calculation and analysis function.

(4) Gain scheduling function:

Sometimes when the system inertia is large or the charge-to-mass ratio changes greatly, the gain of more than two sets of control loop may be set for switching. The start conditions of switching include speed, I/O level, position, etc., and a more humanized gain adjustment interface is provided.

(5) Motion compiled language:

Generally speaking, the motion command of linear motor system is controlled by PLC or the controller. In order to let users can also freely write the motion program on the driver to reach the required motion control, this driver will specially establish all kinds of functions to provide convenience to the users' use, and the users do not need to further learn additional programming language, shortening the time of system construction.

(6) High-speed network communication interface:

As Germany launches the industry 4.0, all kinds of information of the factory transforms from closed to open. In the past, the users must implement management in the factory, while in the future, they may develop into a centralized management mode beyond the factory. The communication interface on the market at present is shown in Figure III, among which the industrial network communication had occupied about 34% in 2015. The use of industrial network is not only faster than traditional communication port, meanwhile, the Netcom device may continue to be used, without the special concentrator equipment, reducing the purchase cost. EtherCAT is the trend of market. Therefore, the driver of CHIEFTEK PRECISION will also establish the communication mode of EtherCAT to respond to the international market demand.

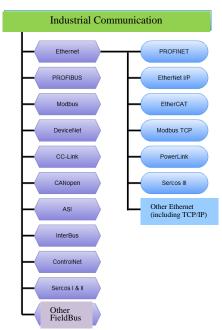

Figure III: Figure of industrial communication protocol types

(7) Anti cogging compensation function:

The linear motor is generally divided into ironless series and ironcore series. The rotor of ironless series is mainly composed of coil, epoxy resin and aluminum base; the stator part is composed through the combination of two rows of magnetic pole relative magnet. While the rotor of ironcore series is formed firstly through the coil winding in the silicon steel sheet, and then through the

epoxy resin packaging in the aluminum base. Because there is the silicon steel sheet to concentrate the magnetic line of force, compared with the ironless series, the stator of ironcore series needs only half of the magnet. Also because in the linear motor, the magnets are rare earth elements, the cost ratio is quite important. But as the ironcore series has the silicon steel sheet of permeability magnetic material, the dynamic phenomenon may easily occur in the moving, causing large speed ripple. In the application of scanning, the error may be easily caused. The driver of CHIEFTEK PRECISION will be available for automatic compensation of anti cogging of any ironcore series linear motor, which will greatly reduce the thrust ripple and increase the speed stability after compensation to make the customers realize the excellent dynamic characteristic of ironless series at the price of ironcore series.

2. Research and development expenditure invested each year in recent five years

Unit: NT\$ in thousand

| Year | 2011 | 2012 | 2013 | 2014 | 2015 |
|---|-----------|---------|---------|-----------|-----------|
| Research and development expenditure(A) | 31,564 | 34,150 | 26,158 | 30,775 | 36,985 |
| Net sales revenue (B) | 1,155,864 | 920,181 | 941,944 | 1,016,920 | 1,021,983 |
| Proportion (A)/(B) | 2.73% | 3.71% | 2.78% | 3.03% | 3.62% |

3. Successfully developed technology or product from the recent five years to the print date of annual report

| Year | Research result |
|------|--|
| 2011 | High thrust density ironless series linear motor Roller chain, roller chain manufacturing mode and linear motion mechanism Applied to reinforcing plate of block, block and linear guide |
| 2012 | Structure of moving parts of the linear guide Circulation channel device of the linear guide Structure of ironless series linear motor coil assembly Structure of winding, smooth retaining chain Anti-dust device of the linear guide |
| 2013 | Four raw ball wide rail type linear guide Hole caps structure of the linear guide Ironcore series linear motor Linear motor module |
| 2014 | Roller type linear guide CLS linear motor module Linear motor servo driver |
| 2015 | Roller type linear guide of each size CLMS dual-track type linear motor module MMLS magnet motive linear motor module 20A linear servo driver |
| 2016 | MMLS linear motor module |

- (IV) Long and short-term business development plan:
 - 1. Short-term business development plan
 - (1) Sales strategy
 - A. Realize the global marketing with the proprietary brand of **cpc**, deep cultivation of existing customers, strengthen the customer service and establish a good interaction.
 - B. Improve the competitiveness of niche products.

- C. Continuously strengthen the operation function of each region to improve the overall revenue.
- (2) Production strategy
 - A. Construct a global management mechanism to integrate the resources of group.
 - B. Increase the production yield rate and operation ratio to increase the competitiveness of products.
 - C. Seek for the appropriate raw material suppliers who have reached suitable price and stable quality.
- (3) Research and development strategy
 - A. Completeness of product series: Linear guide, linear motor, linear motor servo driver.
 - B. Develop the new manufacturing technology to improve the automation degree.
 - C. Develop the mechanical and electrical integration system.
 - D. Customized service.
- (4) Operation strategy
 - A. Strengthen the personnel training to intensify the concept of profession and working.
 - B. Implement the quality policy constantly improved to increase the competitiveness of products.
 - C. Construct perfect financing channels, meanwhile, increase the company's popularity to attract excellent talents.
 - D. Implement each management system to strengthen the management performance.
- (5) Quality policy
 - A. Quality is the result of design, manufacture and management.
 - B. Receive, manufacture and distribute no non-performing product.
 - C. Quality improvement is an uninterrupted activity of the entire personnel.
- (6) Environment and occupational safety and health policy
 - A. Provide a working environment with high quality and available for maintaining physical and psychological health, and reach the goal of no disaster, no accident.
 - B. Protect the environment, maintain the natural ecology, and realize the energy conservation and waste reduction.
 - C. In accordance with the laws, implement the risk management, prevent the pollution, and carry out 6S activities.
 - D. The environmental protection safety is an uninterrupted activity of the entire personnel.
- 2. Long-term business development plan
 - (1) Research and development strategy
 - A. Development of new products: Development of linear module / stage, linear motor driver, torque motor, controller, sensing component, etc.
 - B. Closely cooperate with the upstream, midstream, downstream manufacturers to grow together.
 - C. Implement the software, hardware power and development, and be capable of playing the role of creator continuously on the international stage for a long term.
 - (2) Marketing strategy
 - A. Improve the value of proprietary brand, and increase the international competitiveness.
 - With the continuous enhancement of the company's product quality, then improve the customers' satisfaction and loyalty to products of **cpc**; meanwhile, strengthen the global layout of **cpc**.
 - B. Realize the global marketing with the proprietary brand cpc, and expand the

cpc proprietary brand and good brand image to make **cpc** become the leading brand of linear motion components in the world.

C. Construct the global **cpc** marketing channel to increase the market share.

(3) Operation strategy

- A. Firmly strengthen the operational performance of subsidiaries.
- B. Implement the constant improvement, constant cultivation of personnel quality, and establish the best management team.
- C. Strengthen the cooperation of the related products and industry.

 Implement the industrial division, vertical integration, and strengthen the integration
 - of upstream, downstream industry to establish a powerful product supply chain, and
 - give full play to the advantage of mass production scale economy.
- D. Strengthen the patent layout.

II. Market and Sales Overview

- (I) Market Analysis
 - 1. Sales Region of Main Products

Unit: NT\$ in thousand; %

| | Year | 20 | 14 | 2015 | | |
|--------|----------|----------------------|----------------|-----------|------------|--|
| Sales | Item | Net sales Percentage | | Net sales | Percentage | |
| Region | | revenue | | revenue | | |
| | America | 119,239 | 11.72% | 135,574 | 13.27% | |
| | Europe | 164,004 | 16.13% | 241,569 | 23.64% | |
| Export | Asia | 497,681 | 48.94% | 451,224 | 44.15% | |
| | Others | 1,006 | 0.10% | 1,140 | 0.11% | |
| | Subtotal | 781,930 | 76.89% | 829,507 | 81.17% | |
| | Local | 234,990 | 234,990 23.11% | | 18.83% | |
| | Total | 1,016,920 | 100.00% | 1,021,983 | 100.00% | |

2. Market Share

cpc mainly engages in the research and development, manufacture and sale of precise linear motion components, which belongs to the mechanical drive industry of machinery industry. According to the industrial production statistical data of Ministry of Economic Affairs, the linear guide rail output value of Taiwan in 2015 was about NT\$ 15.68 billion, comparing with the linear guide rail output value in 2014 of about NT\$ 16.66 billion, which reduced 5.88%, while the consolidated revenue of the Company in 2015 was NT\$ 1.021 billion, so it could find the market share of the Company in 2015 was about 6.51%.

- 3. Supply and Demand Status as well as Growth of Future Market
 - (1) Since the linear guide rail is usually the standard substance, the manufacturer could cut depending on their demand, without special processing and order in advance; in addition, the market demand in Taiwan is small, so the international great manufacturers have the price competitive advantage. Therefore, the linear guide rail dealers in Taiwan usually choose to cut in the special niche market or export.
 - (2) According to the industrial production statistical data of Ministry of Economic Affairs, the mechanical drive components include the bearing, ball screw and linear guide rail. Influenced by the global prosperity recovery inferior to the expected and slow-down in Mainland China market, the annual output value in 2015 was NT\$ 51.25 billion, and it estimates the annual output value in 2016 would be NT\$ 51.66 billion, slightly growing for 0.8%.

The **cpc** product aims at improving the client machinery product performance, and increasing the client machinery equipment production efficiency. Under the

tendency of rapid automation, intelligentization and energy saving of the industry, the using demand of **cpc** series product shall grow vigorously.

4. Competition Niche

- (1) Rich R&D experience and price competitiveness
 - A. Based on the rich R&D experience, fast reaction to client and market demand, control the dominant key to success;
 - B. Since the product specifications of standard linear guide rail have certain standardization, there are many competitive manufacturers, and the price competition is quite intense. Although the market demand grows mildly, the relevant manufacturers continue expanding the capacity, plus the Japanese yen devaluated, so there is competition the in price. The **cpc** focuses on the product quality and function, as well as added value, which is influenced less in the high and medium order market, but needs to control the cost in the lower order market, which certainly will become the key factor that whether the Company could be competitive in this market. The Company shall continue improving the new manufacture technology through R&D, and develop the economical product to reduce the cost, while reinforce the local client service quality through the years of sale experience, and subsidiaries in Mainland China, Europe and America as well as technical business representatives in other regions, to maintain the competitiveness of the Company.
 - (2) New product development ability
 - A. The **cpc** linear electrical product technology development trends to the "precision", "speed/efficiency", "reliability / quality", "durability/ service time", "micromation / multifunction", "flexibility / diversity" and "energy conservation / environmental protection", which are the product development tendency of "big data integration", "information processing / communication / transmission / confidentiality...", "remote control", "AI intelligentization".
 - B. In 2015, the linear motor module growth also reflected on the sales performance, while the biggest breakthrough was the **cpc** linear motor module matched with Israel linear servo driver had completely transferred to that matched with own product, and the performance has acquired the affirmation of clients. There also started to match the **cpc** self-developed linear magnetic ruler as the position feedback system, to provide more options for clients.
 - (3) Good service and correct market development strategy
 - To positively develop the client, provide the fast service and maintain good relation with the client, is one indispensable link of the company development. In the beginning stage of development, the Company has paid attention to the client service besides the product quality, and slowly won the trust of clients and continuous cooperation. The Company has established the subsidiaries in Mainland China, Europe and America, to provide the real-time service for the local client, and now seeks for the technical business representative in other important countries, to strengthen the local market service quality, cooperate with local dealers, and positively develop the direct client, to create more business opportunities.
- 5. Favorable and Unfavorable Factors and Countermeasures in the Long Term Development Vision
 - (1) Favorable Factors:

Since founded, **cpc** has invested in the precise linear motion component R&D, manufacture and marketing, which started from the manufacture of miniature linear guide rail, and then the linear guide rail became the main product. In order to expand the future business opportunity, **cpc** has launched the development of linear motor product since 2009, and dedicated to the development of control component "linear motor driver" with high added value, as well as the integrated development of linear

motor module with the linear guide rail, to satisfy the demand of automated equipment.

Along with the manpower cost increasing and market competition fierce, to reduce the production cost, promtoe the product manufacture speed and new product development speed becomes the target of the manufacture industry, thus the productioon equipment automation, numerical control (CNC/NC) and factory automation (FA) have become the goal of manufacture industry input and improvement. Aiming at the demand of production equipment and factory automation (FA), **cpc** could provide the electromechanical integrated system product and service.

The **cpc** product is widely applied to the CNC processing machine, testing platform, LCD processing equipment, optical measuring instrument, handling machine, mechanical arm / automatic machinery equipment, PCB drilling machine, automatic card machine (SMT), Die Bonder, Wire Bonder, laser imprinter, laser cutting machine, nano micromachining equipment. CHIEFTEK PRECISION has invested large amount of resources for innovative R&D, to deeply explore the technology field, accumulate the own patent, and market the **cpc** of own brand to global, which has established the good reputation in the precise machine market monopolied by Japan and Germany for a long time.

The product competitive advantage, core key technology and main product key technology are described respectively as below:

- A. Product competitive advantages of **cpc** are as below:
 - (A) Unique production and manufacture technology: **cpc**'s product quality is stable, because our patent design could reduce the manufacture cost in processing.
 - (B) Product R&D capacity advantage: **cpc**'s product is developed and designed by R&D team, and acquires the patent, to make the product functional quality leading in the industry through the quality control of production personnel.
 - (C) Complete independent R&D in machinery motor specialized technology: R&D team of **cpc** controls the key core technology, with excellent integrating capacity.
 - (D) Positive input for patent layout: **cpc** has acquired several innovation patents, and shall input the patent layout continuously to protect the technology and intellectual property in the future.
 - (E) Electromechanical integration system engineering.
- B. Core key technologies of **cpc** are as below:
 - (A) Bearing technology engineering.
 - (B) Manufacture processing technology engineering.
 - (C) Motor technology engineering.
 - (D) Drive control technology engineering.
- C. Key technologies of main products of **cpc** are described respectively as below:
 - (A) Miniature linear guide rail
 - a. Mass production capacity leading in the industry.
 cpc had made the mass production of linear guide rail of size 3 in 2004, which was the pioneer in the industry.
 - b. Design leading in the industry
 - (a) Embedded patent design:
 - i. Greatly simplify the processing, to make the product with absolute competitive advantage in the manufacture cost.
 - ii. Make the product extremely micro, unable to cause processing difficulty.
 - (b) Embedded lubrication pad design: to make the product with

- permanent lubricating effect.
- (c) Exclusive reinforced pad patent design: to make the product running speed reaching 10 m/sec, higher than the general running speed of 3~5m/sec.
- (d) Operating smoothness could realize the optimal performance.
- (B) Standard linear guide rail
 - a. Design leading in the industry.
 - b. German heavy load capacity design: **cpc**'s product mainly adopts the German design, to make the product load capacity higher, and service life longer.
 - c. Reinforcing plate patent design: **cpc** has the unique reinforcing plate design, to make the running speed reaching 10 m/sec.
 - d. Embedded lubrication pad patent design: to make the product with permanent lubricating effect.
 - e. Waterproof, iron scrape preventive and sealed design: to make the product running smoothness realizes the optimal performance.
 - f. Product service life is longer than other competitor.
- (C) Ironless linear motor
 - a. Design leading in the industry
 - (a) High-efficiency design:

The **cpc** adopts the own researched and developed coil stacking patent technology, with the professional magnetic recording analysis software, to manufacture the maximum motor efficiency of maximum thrust generated under energy consumption per unit of same specification and dimension.

(b) Patented heat dissipation design:

With compact internal design matching the heat dissipation patent technology of special material, **cpc**'s linear motor is featured in the heat dissipation of low thermal resistance.

(c) High thrust density design:

The **cpc** linear motor featured in high efficiency and low thermal resistance, presents the high thrust in the same dimension compared to the competitor, to make the client saving the needed space for motor installation.

(d) Production technology guarantee:

Since the linear motor belongs to the key component of high-precision application industry, all the processes are researched, developed and manufactured by **cpc** own, thus it could indeed control the manufacture quality and quick customized response.

- (D) Ironcore linear motor
 - a. Design leading in the industry
 - (a) Low-pause-power design / low-adsorption design:

Although the ironcore linear motor has high thrust density compared to the ironless type, there also goes along with the pause power, while the pause power would increase the difficulty in the motor running stability and control; thus, **cpc** adopts the special structure design matching the practice and simulation to realize the ironcore linear motor with low pause power.

The adsorption force of ironcore linear motor with special design structure is below 1/2 of that of the industry under the same thrust.

(b) Structure design maximum motor constant:

Optimize the ironcore linear motor's structure group, and build the

Hall component sensor inside the forcer, to achieve the minimum dimension and high heat dissipation capacity to realize the maximum motor constant.

- (E) CHIEFTEK PRECISION follows the extension of linear guide rail product, to develop the water-cooled linear motor suitable for machine tool and PCB drilling machine, featured in controlling the motor temperature rising degree by the cooling liquid under the high-load operation, to avoid influencing the processing plane temperature for thermal expansion. While in the direct drive system, the common component DD motor in the rotational motion is also one of the development key products.
- (2) Unfavorable Factors and Countermeasures
 - A. Difficulty in talent acquisition and cultivation

Facing with the transformation automation, whether Taiwan shall play the role of user or creator, it shall be considered deeply. The role of user would easily be replaced. In the industry 4.0, we need more R&D talents, to improve the added value. The industry 4.0 not only has powerful influence on the industry, but also makes significant change in various industries. The manpower demand trends to the simplification and high quality. Under this circumstance, the talent demand would greatly change the production.

Countermeasures:

cpc's main technology is developed by own, thus the internal training mechanism shall be independent, in the handling principle of divided management, clear rights and liabilities, distinct right and wrong, encouraging innovations, brave to admit the fault, and continuing improvements. In the future, it shall reinforce the industry-academy cooperation, cultivate more talents, to realize the application of knowledge, and promote the welfare system of the Company, to attract and stay the talent. Although there are many difficulties in the talent recruitment and talent cultivation, those who pass the test would become the greatest asset of the Company.

B. Accession of new competitive manufacturer

Along with the market demand grows, the competitors to share the market are more and more, which is also the rule of free competition.

Countermeasures:

All the products of **cpc** are the own developed key technology, and there accumulates rich experience from the product mass production; the policy responding to the new manufacturer is to make advance and innovation by the Company own. In the future, **cpc** shall continue investing more R&D manpower, and widen the gap with the competitor by high-order and innovative product in the product development.

- (II) Important Uses and Production Procedures of Main Products:
 - 1. Important Uses of Main Products
 - (1) Linear guide rail

Mainly apply to the automation industry, machine tool industry, TFT-LCD, photoelectrical manufacture detection and carrier, electronic industry machinery equipment, and semiconductor manufacture detection/packaging/handling equipments, medical instrument, printing and packaging machine, industrial machine and aerospace industry, and national defense industry, etc.

(2) Linear motor

The machinery equipments with output capacity demand are the main selling market of linear motor. Taking the ironless linear motor as example, it has no pause power and has light forcer, which is particularly suitable for the application in the semiconductor industry, panel industry, biochemical technology, laser cutting and automation industry. While the ironcore linear motor with high thrust and low stator

cost is suitable for the application in the automated storage, solar energy industry, laser industry, panel industry, and semiconductor carrier and automation industry.

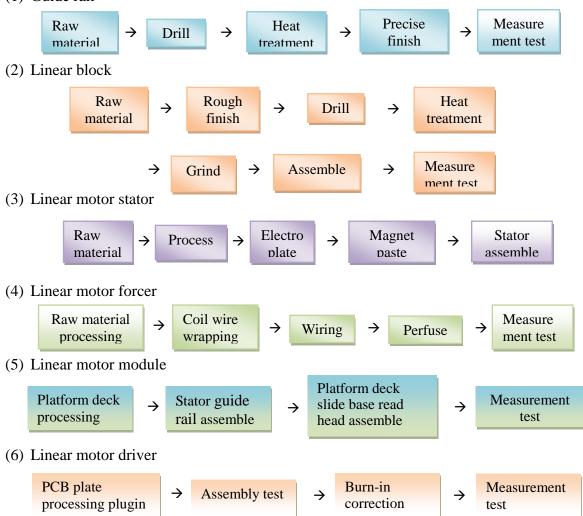

(3) Driver and linear motor module

At present, the major linear motor goes with the driver in the drive method of one to one, thus the occasion to use the linear motor is also the market of driver and linear motor, which is just different in the using habit and form of the client.

2. Production Procedures of Main Products

The main production flows of the product produced by **cpc** are as below:

(1) Guide rail

(III) Supply Status of Main Materials

cpc mainly engages in the manufacture of linear guide rail, whose major raw materials are the cold drawn, plastic fittings and steel balls, and the purchase source is the domestic and overseas manufacturer, which all have established the long-term and good cooperation relation with the Company. As of now, the supplying condition of major raw materials of the Company is good.

| major raw materials of the company is good. | | | | | | | |
|---|--|------------------|--|--|--|--|--|
| Major raw material Supplier | | Supply condition | | | | | |
| Cold drawn | Company A, Company B, Company F, Company M | Normal | | | | | |
| Plastic fittings | Company E, Company J | Normal | | | | | |
| Steel ball | Company C, Company O | Normal | | | | | |

In addition, the major raw materials of linear motor are the rare earth magnet, enameled wire and epoxy resin, with suppliers all over the world, with long-term and good cooperation mode, to ensure the normal major raw material supply.

| Major raw material | Supplier | Supply condition |
|--------------------|--|------------------|
| Rare earth magnet | Company A, Company B, Company C, Company D | Normal |
| Enameled wire | Company E, Company F | Normal |
| Epoxy resin | Company G, Company H, Company I | Normal |

Linear motor driver

| Major raw material | Supplier | Supply condition |
|----------------------|---------------------------------|------------------|
| PCB board | Company A, Company B | Normal |
| Electronic component | Company C, Company D, Company E | Normal |
| Shell | Company F, Company G, Company H | Normal |
| Cooling fin | Company H, Company I | Normal |

(IV) Major Suppliers and Clients

1. Major suppliers in the last two calendar years and purchase amount and percent as well as change reason explanation

Unit: NT\$ in thousand; %

| | 2014 | | | | 2015 | | | As of first quarter of 2016 | | | | |
|----------|-----------------------|---------|-------------|----------------------------|-----------------------|---------|-------------|-----------------------------|-----------------------|--------|-------------|----------------------------|
| It em | Company Name | Amount | Percent (%) | Relation with Issuer | Company Name | Amount | Percent (%) | Relation with Issuer | Company Name | Amount | Percent (%) | Relation with Issuer |
| 1 | Company A | 42,466 | 21.82 | No | Company A | 64,042 | 29.42 | No | Company A | 8,194 | 22.97 | No |
| 2 | Company B | 26,849 | 13.80 | No | Company B | 25,180 | 11.57 | No | Company D | 5,958 | 16.70 | No |
| 3 | Company C | 21,113 | 10.85 | No | - | - | - | No | Company C | 4,175 | 11.71 | No |
| 4 | - | - | - | No | - | - | - | No | Company B | 4,075 | 11.42 | No |
| | Others | 104,180 | 53.53 | No | Others | 128,434 | 59.01 | No | Others | 13,269 | 37.20 | No |
| | Net Total Supplies | 194,608 | 100.00 | | Net Total Supplies | 217,656 | 100.00 | | Net Total Supplies | 35,671 | 100.00 | |

- Note 1: Major suppliers with gross purchase over 10% in the last two calendar years and purchase amount and percent are list above, but the contract has stipulated not to disclose the supplier name or transaction object as individual or non-related party, so it is listed in code name.
- Note 2: Increase or decrease reason: in 2015, it increased 11.84% compared to 2014, mainly because the effect of reducing the integrated inventory was remarkable after three years of efforts, and the inventory level reached the reasonable level, thus the purchase amount in 2015 increased gradually.
 - 2. Major clients in the last two calendar years and sale amount and percent as well as change reason explanation

Unit: NT\$ in thousand; %

| | | 2014 | | | 2015 | | | As of first quarter of 2016 | | | | |
|----------|-----------------|---------------|-------------|----------------------------|-----------------|----------|-------------|-----------------------------|-----------------|---------|-------------|----------------------------|
| It em | Company Name | Amoun t | Percent (%) | Relation with Issuer | Company Name | Amount | Percent (%) | Relation with Issuer | Company Name | Amount | Percent (%) | Relation with Issuer |
| 1 | Company A | 72,444 | 7.12 | No | Company C | 73,348 | 7.18 | No | Company E | 13,668 | 6.29 | No |
| 2 | Company C | 70,371 | 6.92 | No | Company A | 72,950 | 7.14 | No | Company A | 9,957 | 4.58 | No |
| 3 | Company B | 66,348 | 6.52 | No | Company D | 72,433 | 7.09 | No | Company D | 9,451 | 4.35 | No |
| | Others | 807,757 | 79.44 | No | Others | 803,252 | 78.59 | No | Others | 184,331 | 84.78 | No |
| | Net Sales | 1,016,92 0 | 100.00 | | Net Sales | 1,021,98 | 100.00 | | Net Sales | 217,407 | 100.00 | |

Note 1: Major clients with gross sales over 10% in the last two calendar years and sale amount and percent are list above, but the contract has stipulated not to disclose the client name or transaction object as individual or non-related party, so it is listed in code name.

Note 2: Increase or decrease reason: the main client of **cpc** in recent two years and as of the first quarter of 2016 changes along with the sales market and client demand, but without obvious change.

(V) Production in the Last Two Years

Unit: 1,000 pieces/ Unit: NT\$ in thousand

| Year | | 2014 | | | 2015 | |
|----------------------------------|----------|----------|---------|----------|----------|---------|
| Major Products | Capacity | Quantity | Amount | Capacity | Quantity | Amount |
| Linear guide rail and slide base | 609 | 518 | 725,476 | 620 | 527 | 881,901 |
| Linear motor | 4 | 3 | 4,925 | 31 | 26 | 36,447 |
| Others | 0 | 0 | 0 | 0 | 0 | 0 |
| Total | 613 | 521 | 730,401 | 651 | 553 | 918,348 |

Note: Production change and analysis: The effect of the Company reducing the integrated inventory was remarkable, so there increased the production input in 2015, which caused the increase in production of 2015.

(VI) Sales in the Last Two Years

Unit: 1,000 pieces / Unit: NT\$ in thousand

| Sales Year | | 2014 | | | 2015 | | | |
|----------------------------------|----------|---------|----------|---------|----------|---------|----------|---------|
| | Lo | cal | Ex | port | Lo | cal | Exp | ort |
| Major Products | Quantity | Amount | Quantity | Amount | Quantity | Amount | Quantity | Amount |
| Linear guide rail and slide base | 173 | 231,021 | 1,341 | 778,240 | 140 | 186,668 | 1,375 | 798,074 |
| Linear motor | 2 | 3,303 | 8 | 4,356 | 4 | 5,807 | 58 | 31,433 |
| Others | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 |
| Total | 175 | 234,324 | 1,349 | 782,596 | 144 | 192,475 | 1,433 | 829,507 |

Note: Sales change and analysis:

The Company positively developed and domestic and oversea new market and new client, which cause the increase in both local and export performance.

III. Number of Employees of Recent Two Years as of Printing Date

May 16, 2016

| | Year | 2014 | 2015 | As of May 16, 2016 |
|------------|--------------------------|--------|--------|--------------------|
| | Administrative staff | 75 | 68 | 71 |
| Number of | R&D personnel | 25 | 31 | 31 |
| Employees | Business personnel | 34 | 34 | 31 |
| Limployees | Field staff | 241 | 237 | 223 |
| | Total | 375 | 370 | 356 |
| | Average Age | 34.83 | 36.15 | 35.78 |
| A | Average Years of Service | 2.49 | 3.13 | 3.54 |
| | Ph.D. | 0.08% | 0.08% | 0.00% |
| | Masters | 20.69% | 7.54% | 6.86% |
| Education | Bachelor's Degree | 42.40% | 51.85% | 52.16% |
| | Senior High School | 29.68% | 24.53% | 26.41% |
| | Below Senior High School | 7.15% | 16.00% | 14.57% |

IV. Environmental Protection Expenditure

For the loss or penalty caused by environmental pollution during the latest year and up to the printing date of this annual report, and the future countermeasures as well as possible expenditures:

(I) According to the regulation provisions, those applying for the pollution facility setting license or pollution discharge license or payable pollution prevention expense or needing to set the environmental protection specific personnel, the explanation of application, payment or setting condition is as below: **cpc** is the linear guide rail manufacturer, located in Southern Taiwan Science Park, and has applied and acquired the pollution facility setting license or pollution discharge license according to the environmental protection laws.

(II) Main equipment and its usage as well as possible benefit invested by the Company for the environmental pollution prevention:

Unit: NT\$ in thousand; May 16, 2016

| Equipment Name | Qty | Acquisition Date | Invested Cost | Balance | Usage and Estimated Benefit |
|---|-----|---------------------|------------------|---------|-----------------------------|
| Water pollution prevention project | 1 | June 21,2004 | 1,387 | 878 | Sewage treatment necessity |
| Newly add the activated carbon equipment, modify the sand leach tower, and replace the biological filter material project | 1 | December 29,2015 | 500 | 475 | Sewage treatment necessity |

- (III) During the environmental pollution progress of the Company in the latest year and up to the printing date of this annual report, there is any pollution dispute, and it shall describe the disposal process: the Company has no pollution dispute during the latest year and up to the printing date of this annual report.
- (IV) During the latest year and up to the printing date of this annual report, the loss (including compensations) and punishment sum caused by the environmental pollution of the Company, and disclosed future countermeasures (including improvement measures) and possible expenses (including the estimated amount of possible loss, punishment and compensation if not taking the countermeasures; if unable to estimate reasonably, it shall state the fact unable to estimate reasonably): None.
- (V) Present pollution status and influence of improvement to the company surplus, competition status and capital expenditure, and estimated significant environmental protection capital expenditure in future two years: None.

V. Labor Relations

- (I) Employee welfare measure, advanced study, training, retirement system and implementation condition, and agreement on labor and capital as well as various staff rights and interests maintenance measure condition of the Company:
 - 1. Employee welfare measures and implementation condition:
 - (1) Weekly two day-off and paternity leave.
 - (2) Competitive salary.
 - (3) In-service training.
 - (4) Wedding and funeral cash gifts.
 - (5) Flexible reward system.
 - (6) Spring Festival cash gifts.
 - (7) Pension allocation.
 - (8) Labor health insurance and occupation insurance.
 - (9) Lunch and supper subsidy.
 - (10) Employee stock bonus.
 - (11) Periodical employee health examination, disease medical treatment and consulting service.
 - (12) Female colleague breastfeeding room.
 - (13) Year-end thanksgiving party, travelling and gathering.
 - 2. Employee advanced study, training system and implementation condition:

The Company dedicates in creating the study environment for talent sustainability and excellent competitiveness improvement, specially formulates the "educational training management procedure" and "educational training operational procedure", to cultivate the proper excellent talent via the internal and external training resource.

At present, the Company provides a series of common knowledge, professional skill and management educational trainings, to cultivate the section head and senior colleagues as the internal lecturer to inherit the company culture and skill, and also irregularly invite the external specialists to give instructions. In 2015, the Company held training course

over 1,672 classes, total training hours nearly 2,242 hours, and total participated persons of 17,786 person-times.

The training courses in 2015 include:

- (1) New employee educational training: include the company regulations, labor, safety and health related introduction as well as the arrival guidance; every new employee has the educational trainer, to assist adapting the work environment, and familiar with the work content as soon as possible.
- (2) Common knowledge training: refer to the common knowledge training activity required by government decree and company policy and the whole company overall or all sectors of groups, such as: education of prohibition and prevention of insider trading, staff HSE educational training, safety and sanitation training course, quality training course, factory emergency response training course, fire-control and labor safety training course, and personal performance management series course.
- (3) Professional training: refer to the technology and professional training of each unit, such as R&D course, processing course, finance and accounting course, information technology course.
- (4) Supervisor training: refer to the planning supervisor management training and development course. The content includes the management and leadership control course as well as other matched courses.
- (5) Direct personnel training: refer to the training course providing the necessary knowledge, skill and attitude of production line technical personnel, such as the direct personnel machine skill training course.
- (6) Periodically make the technical evaluation and performance evaluation, positively train the reserve cadres and talents.
- Employee retirement system and implementation condition: the Company's
 retirement system mainly bases on the relevant laws and regulations of labor
 standard act.
 - (1) Allocate the retirement reserve fund monthly to the labor retirement reserve fund supervision committee special account according to the provisions, and have overall implemented the "Labor Pension Act" since July 1, 2005, in which the applicable provisions are as below:
 - A. Employee arriving the post after July 1, 2005 (included) shall be entirely applicable for the "Labor Pension Act".
 - B. Employee arriving the post before July 1, 2005 (excluded) shall select the pension provision of "Labor Pension Act" or "Labor Standard Law" depending on personal actual demand within five years since July 1, 2005; if the colleague selects to continuously apply the pension provision of "Labor Standard Law", the Company shall allocate the pension to the employee pension special account monthly.
 - (2) If the colleague has any one of the conditions below, it shall apply for retirement voluntarily:
 - A. Taking office over 15 years (included) and over 55-year-old.
 - B. Taking office over 25 years (included).
 - C. Taking office over 10 years (included) and over 60-year-old.
 - (3) If the colleague has any one of the conditions below, it shall be forced to handle the retirement:
 - A. Over 65-year-old
 - B. Lunacy or physically disabled for the work
 - (4) Pension allocation shall be handled according to the provision of Article 55:

For the seniority of old system, the seniority of first 15 years shall be given 2 cardinal numbers for every one full year, and the seniority over 15 years shall be given 1 cardinal numbers for every one full year; except for the forced retirement caused by occupational injury and disease, the highest numbers shall be limited to 45 cardinal numbers.

- (5) The new system pension shall monthly allocate 6% to labor pension special account.
- 4. Agreement on labor and capital as well as various staff rights and interests maintenance measure condition:

The Company adopts the open and two-way communication method for the policy advocacy and employee opinion, uses E-MAIL and bulletin board to timely deliver the relevant information, complaint box, conference communication, supervisor communication, and welfare committee, to maintain the labor and capital relation harmoniously, and keep away the labor and capital disagreement.

- (II) During the latest year and up to the printing date of this annual report, for the losses caused by labor dispute, and disclosure of current and future possible estimated amount and response measures:
 - 1. As of now, there is no significant labor dispute, and there is no labor and capital disagreement, nor the loss caused by labor dispute.
 - 2. Current and future possible response measures:
 - (1) Fully abide by the labor law.
 - (2)Continuously maintain the open and honest labor-capital communication channel and complaint channel.
 - 3. Current and future possible losses: the labor-capital relation of the Company is normal and harmonious, which shall not cause significant loss.

VI. Important Contracts

| Contract Nature | Counterparty | Contracted Period | Major Contents | Restrictions |
|----------------------|-------------------------------|--------------------|--------------------------|--------------|
| Medium and long-term | Six banks including Mega | December 09,2014 ~ | Joint credit | Note 1 |
| borrowings | International Commercial Bank | December 09,2019 | granting contract | Note 1 |
| Medium and long-term | Donk of Toisson | July04,2011~ | Credit granting | No |
| borrowings | Balik Of Talwall | July04,2018 | contract | |
| Short-term, medium | | June 23,2011~ | Cradit granting | No |
| and long-term | Bank of Taiwan | <i>*</i> | Credit granting contract | |
| borrowings | | February 10,2017 | Contract | |
| Medium and long-term | Chang Hyya Dank | February 17,2012~ | Credit granting | Note 2 |
| borrowings | Chang fiwa bank | February 17,2018 | contract | |
| Land lease | Southern Taiwan Science Park | January 01,2003 ~ | Land lease | No |
| Land lease | Administration | December 31,2022 | contract | |
| I and loose | Southern Taiwan Science Park | August 28,2014 ~ | Land lease | No |
| Land lease | Administration | August 27,2034 | contract | |

Note 1: The Company shall follow the provision of joint credit granting contract, and make commitment of following items to the joint loan bank consortium during the joint credit granting period:

During the joint credit granting period, according to the accountant checked annual report or accountant audited consolidated financial statement of second quarter, the Company shall maintain the following financial ratio, and be inspected once every half year:

- (1) Liquidity ratio (current asset/current liability): over 100% (included).
- (2) Debt ratio (total liability/net value): below 150% (included).
- (3) Tangible net worth (amount of stockholders' equity deducting intangible asset): over NT\$ 1,000,000 thousand (included).

Note 2: The credit granting contract with Chang Hwa Bank has been extended from February 17, 2017 to February 17, 2018.

| Leverage | Operating leverage | | 2.00 | 4.30 | 5.15 | 2.54 | 2.72 |
| | Financial leverage | | 1.19 | 1.76 | 1.98 | 1.23 | 1.20 |

Analysis of financial ratio differences for the last two years. (Not required if the difference does not exceed 20%)

- 1. The increase of current ratio and quick ratio is mainly to reduce the integrated inventory, so the inventory sales ratio is accelerated and with remarkable effect. In addition, the profit of 2015 was high, and repaid the short-term borrowings, which made the current liability reducing compared to previous year.
- 2. The turnover rate of accounts payable reduced 5.71 times, because the Company operated well, increased the purchase amount and concluded good payment term with the manufacturer; besides, the inventory sales performance was good, production investment increased, and unit cost decreased, which made the cost reduction.
- 3. Times interest earned, return on assets, return on equity, pre-tax net income to paid-in capital ratio, net profit ratio, earnings per share, cash flow ratio, cash flow adequacy ratio increased, because the sales volume of miniature series in 2015 increased, which made the operating revenue of 2015 increased, Operating costs decreased, and linear motor product sales volume increased comparing to the previous year, and thereupon the profit increased.
- 4. Operating leverage and financial leverage reduced, because the sales volume of miniature series in 2015 increased, which made the operating revenue of 2015 increased, Operating costs decreased, thereupon the profit increased, and interest expense reduced.
- Note 1: In 2011, the financial data had not applied IFRS, thus there is no data.
- Note 2: The financial data of 2012, 2013, 2014 and 2015 had been audited by the accountant.
- Note 3: The financial data as of March 31, 2016 has been audited by the accountant.
- Note 4: Relevant operation capacity and profitability related financial ratio is calculated by the annual numbers.
- Note 5: Calculation formulas are as below:

- 1. Financial structure
 - (1) Ratio of liability to asset = total liability / total asset.
 - (2) Ratio of long-term capital to real estate, plant and equipment = (total equity + non-current liability) / real estate, plant and equipment net amount.
- 2. Solvency
 - (1) Current ratio = current asset / current liability.

 - (2) Quick ratio = (current asset inventory prepaid expense) / current liability.
 (3) Interest earned ratio=net profit before income tax and interest expense/current interest
- 3. Operating performance
 - (1) Accounts payable (including accounts receivable and notes receivable caused by business) turnover ratio = net sales/average accounts receivable ((including accounts receivable and notes receivable caused by business) balance.
 (2) Average collection days = 365 / accounts payable turnover ratio.

 - (3) Inventory turnover ratio = sales cost / average inventory.
 (4) Accounts payable (including accounts payable and notes payable caused by business) turnover ratio = sales cost / average accounts payable (including accounts payable and notes payable caused by business) balance.
 - (5) Average days in sale = 365 / inventory turnover ratio.
 - (6) Property, plant and equipment turnover ratio=net sales/average real estate, plant and equipment net amount.
 - (7) Total assets turnover ratio = net sales / average total assets.
- 4. Profitability
 - (1) Return on assets = (after-tax profit and loss + interest expense \times (1 tax rate)) / average total
 - (2) Return on equity = after-tax profit and loss / average total equity.
 (3) Net profit ratio = after-tax profit and loss / net sales.

 - (4) Earnings per share = (equity attributable to shareholders of parent company preference dividend) / weighted average issued share number. (Note 4)
- 5. Cash flow
 - (1) Cash flow ratio = net cash flow of operating activity / current liability.
 - (2) Net cash flow adequacy ratio = net cash flow of operating activity in recent five years / recent five years (capital expenditure + inventory increase + cash dividend).
 - (3) Cash reinvestment ratio = (net cash flow of operating activity –cash dividend) / (real estate, plant and equipment gross + long-term investment + other non-current asset + working capital).
- 6. Leverage:
 - (1) Operating leverage = (net operating revenue—changed Operating costs and expense) / operating
 - (2) Financial leverage = operating profit / (operating profit interest expense).
- Note 6: Calculation formula of above earnings per share shall pay attention to following items when measuring:
 - 1. Subject to weighted average common share number, not based on issued share numbers in the end of the year.
 - 2. If there is increment of cash or treasury stock transaction, it shall consider the circulation period, and calculate the weighted average share number.
 - 3. If there is surplus transferred to increment or capital reserve transferred to investment, when calculating the earnings per share of the previous year and half year, it shall trace and adjust according to increment proportion, without any consideration of issuing period of the increment.
 - 4. If the special stock is the inconvertible accumulative special stock, its dividend of that year (no matter issued or not) shall be deducted from the profit (loss) for the year, or increase the after-tax net loss. If the special stock is non-cumulative type, when there is after-tax dispute, the special stock dividend shall be deducted from the profit (loss) for the year; if it is loss, it shall not be adjusted.
- Note 7: Cash flow analysis shall pay special attention to the following items when measuring:
 - 1. Net cash flow of operating activity refers to net cash inflow of operating activity in cash flow
 - 2. Capital expenditure refers to the cash outflow of annual capital investment.
 - 3. Inventory increment shall only be accounted when the ending balance is greater than beginning balance, and if the inventory decreases in the end of the year, it shall be calculated as zero.
 - 4. Cash dividends include the cash dividend of common stock and special stock.
 - 5. Real estate, plant and equipment gross refer to the sum of real estate, plant and equipment before deducting the accumulated depreciation.
- Note 8: Issuer shall divide the Operating costs and Operating expenses in to the fixed and changeable one; if involving the estimation or subjective judgment, it shall pay attention to the rationality and maintain the consistency.
- Note 9: If the company share has no denomination or the denomination per share is not NTD\$ 10, the above ratio calculation related to paid-in capital shall be changed to calculate the ratio of equity attributable to shareholders of parent company of balance sheet.

| | dollars) | | | | | |
| | Cash flow ratio (%) | 31.59 | | | | |
| Cash flow | Cash flow adequacy ratio (%) | 39.59 | | | | |
| | Cash reinvestment ratio (%) | 8.44 | | | | |
| Leverage | Operating leverage | 1.80 | | | | |
| Leverage | Financial leverage | 1.03 | | | | |

Analysis of financial ratio differences for the last two years. (Not required if the difference does not exceed 20%) None.

Note 1: Relevant financial documents are audited and certified by accountants.

Note 2: The formula is as follows:

- 1. Financial structure
- (1) The proportion of liabilities covered by assets = total liabilities/total assets.
- (2) The proportion of long-term funds covered by fixed assets = (Shareholder's net equity + long-term liability)/net value of fixed assets.
- 2. Debt-paying ability
 - (1)Current ratio = current assets/current liability.
 - (2)Quick ratio = (current assets-inventory prepaid expenses)/current liability.
- (3)Time interest earned ratio = income tax and net profit before interest expense/current interest expense.
 - 3. Business capacity
 - (1)Receivables (including receivables and the notes receivable produced by the business) turnover = net sales/each average receivables (including receivables and the notes receivable produced by the business) balance.
 - (2) Average collection days = 365/receivables turnover.
 - (3)Inventory turnover = Cost of goods sold/average inventory.
 - (4)Receivables (including receivables and the notes receivable produced by the business) turnover = net sales/each average receivables (including receivables and the notes receivable produced by the business) balance.

- (5)Average sales days = 365/inventory turnover.
- (6) Fixed asset turnover = net sales/average net value of fixed assets.
- (7)Total assets turnover = net sales/average total assets.
- 4. Profitability
- (1)Return on assets = (post-tax profit or loss + interest expense× (1–tax rate) /average total assets.
- (2) Shareholder's return on equity = post-tax profit or loss /average shareholder's net equity.
- (3) Net profit ratio = post-tax profit or loss /net sales.
- (4)Earnings per share = (net profit after tax preference dividend) /weighted average issued shares.
- 5. Cash flow
 - (1)Cash flow ratio = operating activities net cash flow/current liability.

 net cash flow adequacy ratio = Net cash flow from operating activities for the Past Five Years

 /for the Past Five
 - (2) Years (capital expenditure + inventory increases + cash dividends).
 - (3)Cash re-investment ratio = (operating activities net cash flow cash dividends)/(fixed asset's gross amount + long-term investment + other assets + working capital).
- 6. Lever degree:
- (1)Degree of operating leverage = (net revenue business change costs and expenses)/ sales revenue.
- (2)Degree of financial leverage = sales revenue / (sales revenue-interest expenses).
- Note 3: For the calculation formula of the above earnings per share, the following matters shall be paid attention

to:

- 1. Be subject to the weighted average of common stock shares rather than by then end of the year.
- 2. The one goes through a cash capital increase or treasury stock trading shall consider calculating the weighted average outstanding shares during the circulation period.
- 3. The one goes through surplus capital increase or turn add equity capital accumulation fund shall carry out retroactive adjustment based on capital increase ratio when calculating the earnings per share of previous years and semiannual.
- 4. If the preferred stock is the non-convertible cumulative stock, the current annual dividend (whether issued or not) shall be deducted from post-tax profit or added to post-tax loss. If the preferred stock is not cumulative, it shall be deducted from the post-tax profit; and it needs no adjustment if it losses.
- Note 4: Pay attention to the following matters when measuring cash flow analysis:
 - 1. Operating activities net cash flow refers to the net cash inflows of operating activities in the Cash Flow Table.
 - 2. Capital expenditure refers to capital investment cash outflows each year.
 - 3. Inventory increases is only included when ending balance is larger than beginning balance. If the inventory at the end of year is decreased, then it will be calculated as zero.
 - 4. Cash dividends include common stock and preferred stock's cash dividends.
 - 5. Fix asset's gross amount refers to the total fixed assets before deducting accumulated depression. Note 5: The issuer shall divide Operating costs and Operating expenses as fixed or changed depending on the nature. If estimates or subjective judgements are involved, it shall pay attention to its rationality and maintain consistency.

III. Auditing report for recent annual financial statement prepared by Supervisor

CHIEFTEK PRECISION CO., LTD. Supervisor's Auditing Report

Hereby to approve,

The undersigned PwC TW LIN TZU-YU and LIU TZU-MENG have duly audited the Operating Report, Financial Statements and Schedule of Earnings Distribution prepared by the supervisor for the year of 2015, and issued recorded unqualified opinion auditing report. All statistical forms shall be compiled in accordance with the law after being reviewing by the Supervisor. Any discrepancies shall be reported to the superior in accordance with Article 219 of the *Company Law*.

With respect,

CHIEFTEK PRECISION CO., LTD. 2016 SHAREHOLDERS MEETING

CHIEFTEK PRECISION CO., LTD.

Supervisor: KUANG HSI-HUI

Supervisor: LI MEI

Supervisor: TSENG HSU-WEN

March 17, 2016

- IV. Recent consolidated financial statements and report of independent accountants: Please refer to page 102-153 Chinese annual report.
- V. Recent parent company only financial statements and report of independent accountants: Please refer to page 154-205 Chinese annual report.
- VI. If any financial difficulties happen to the Company and its affiliate enterprises by the deadline of annual report printing, then its impact on the Company's financial condition is: None.

VII. Review of Financial Conditions, Financial Performance, and Risk Management

I . Analysis of Financial Status

Comparative analysis table of financial condition

Unit: NT\$ in thousand

| Year | 2015 | 2014 | Increase (decrease) | |
|---|-----------|-----------|---------------------|---------|
| Accounting subject | Amount | Amount | Amount | % |
| Current assets | 1,195,278 | 1,305,890 | (110,612) | -8.47% |
| Property, plant and equipment | 661,307 | 770,097 | (108,790) | -14.13% |
| Intangible assets | 53,104 | 51,284 | 1,820 | 3.55% |
| Other assets | 366,567 | 364,798 | 1,769 | 0.48% |
| Total assets | 2,276,256 | 2,492,069 | (215,813) | -8.66% |
| Current liabilities | 446,440 | 638,344 | (191,904) | -30.06% |
| Non-current liabilities | 510,285 | 565,386 | (55,101) | -9.75% |
| Total liabilities | 956,725 | 1,203,730 | (247,005) | -20.52% |
| Equity attributable to owners of the parent | 1,319,531 | 1,288,339 | 31,192 | 2.42% |
| Capital stock | 592,338 | 592,338 | _ | |
| Capital reserves | 463,051 | 463,051 | | |
| Retained earnings | 370,662 | 331,149 | 39,513 | 11.93% |
| Other equity interest | 12,024 | 15,168 | (3,144) | -20.73% |
| Treasury stock | (118,544) | (113,367) | (5,177) | -4.57% |
| Non-controlling interests | - | _ | | |
| Total equity | 1,319,531 | 1,288,339 | 31,192 | 2.42% |

Analysis of changes in financial ratios (more than 20% are changed and the changed amount is up to above NT\$10 million):

^{1.} Decrease of current liabilities and total liabilities: whose main reasons are:

^{(1) 2015} annual profit is not bad and the repaid short-term loan is up to NT\$224,432 thousand, causing the decrease of current liabilities.

⁽²⁾ The repaid long-term loan is up to NT\$80,854 thousand, causing the decrease of long-term liabilities and total liabilities.

II. Analysis of Financial Performance

(A) Comparative analysis table of financial performance:

Unit: NT\$ in thousand

| Year | 2015 | 2014 | Increase (de | ase (decrease) | |
|--|-----------|-----------|--------------|----------------|--|
| Accounting subject | Amount | Amount | Amount | % | |
| Sales revenue | 1,021,983 | 1,016,920 | 5,063 | 0.50% | |
| Operating margin | 306,404 | 240,920 | 65,484 | 27.18% | |
| Operation profit and loss | 96,156 | 39,152 | 57,004 | 145.60% | |
| Non-operating income and expenses | (14,741) | (7,334) | (7,407) | -101.00% | |
| Net profit before tax | 81,415 | 31,818 | 49,597 | 155.88% | |
| Net profit of the term to continue business unit | 70,782 | 20,743 | 50,039 | 241.23% | |
| Loss of stop operating | _ | - | - | - | |
| Net profit (loss) of the term | 70,782 | 20,743 | 50,039 | 241.23% | |
| Other comprehensive (loss) Income (net profit after tax) | (6,296) | 9,574 | (15,870) | -165.76% | |
| Total comprehensive income (loss) | 64,486 | 30,317 | 34,169 | 112.71% | |
| Parent company owner's net profit | 70,782 | 20,743 | 50,039 | 241.23% | |
| Non-controlling interest's net profit | - | - | - | - | |
| Parent company owner's consolidated profit | 64,486 | 30,317 | 34,169 | 112.71% | |
| Non-controlling interest's consolidated profit | - | - | - | _ | |
| Earnings per share (NT\$ in dollars) | 1.26 | 0.35 | 0.91 | 260.00% | |

Analysis of changes in financial ratios (more than 20% are changed and the changed amount is up to above NT\$10 million):

- 1. Operating margin has increased NT\$65,484 thousand, whose main reasons are:
 - (1) The revenue of linear motor has significant increased NT\$29,583 thousand and the growth rate is up to 386.28%, causing the increase of margin.
 - (2)Proportion change of product category: revenue proportion of high-margin miniature linear guide has increased, causing the increase of margin.
 - (3)The Company strictly implements austerity policy and strictly controls costs. Among manufacturing overhead, miscellaneous expenditure has the most significant decrease. Depreciation and other fixed cost are also decreased.
- 2. In summary, operation profit and loss, net profit before tax, net profit of the term to continue business unit, net profit of the term, total comprehensive income(loss), parent company owner's net profit, parent company owner's consolidated profit and earnings per share have increased.
- 3. Due to the impact of Euro exchange rate depreciation on non-operating income and expenses, convertible interest in 2015 has significant decreased compared to 2014.
 - (B) Expected sales volume and its basis:

Please refer to "Letter to Shareholders".

(C) Possible impact on the Company's future financial business and contingency plan:

With the continuous growth of business, the Company's operation scale is also expanding. The Company seeks a long-term stable capital source to deal with capital expenditures in terms of finance and thereby improve financial ratios and make financial structure more complete.

III. Cash flow

(A) Cash Flow Analysis for the Current Year

| | Unit: NT\$ in thousand | | | | |
|--|------------------------|-----------|-------------|----------|--|
| Year | 2015 | 2014 | Increase (d | ecrease) | |
| Accounting subject | Amount | Amount | Amount | % | |
| operating activities inflows (outflows) | 303,142 | 343,028 | (39,886) | -11.63% | |
| Investment activities inflows (outflows) | (20,951) | (49,661) | 28,710 | -57.81% | |
| Financial activities inflows (outflows) | (292,781) | (220,932) | (71,849) | 32.52% | |
| Net cash inflows (outflows) | (14,717) | 81,986 | (96,703) | -117.95% | |

- 1. Net cash inflow decrease of operating activities: whose main reasons are:
 - (1) Depreciation fee has decreased NT\$13,909 thousand compared to last stage.
 - (2) After years of the implementation of destocking measure, the inventory on hand has significantly decreased. It has decreased up to NT\$91,786 thousand in 2015, which is less than that of NT\$149,469 thousand in previous year, but still with remarkable efficiency.
- 2. Net cash inflow decrease of investment activities: due to no other major capital expenditures in 2015 except minor purchase.
- 3. Net cash outflow increase of financial activities: mainly due to good profit in 2015, which cause:
 - (1) The repaid short-term loan in 2015 is up to NT\$224,432 thousand. Compared to the repaid short-term loan of NT\$21,070 thousand in previous year, the repaid short-term loan in 2015 has increased NT\$203,362 thousand.
 - (2) The repaid long-term loan in 2015 is NT\$80,854 thousand. Compared to the repaid long-term loan of NT\$ 80,409 thousand in the previous year, the repaid long-term loan in 2015 has decreased NT\$45,354 thousand.
 - (3) Cash dividend amount in 2015 has increased NT\$16,875 thousand compared to the previous year.
 - (4) The purchased treasury stock amount in 2015 has decreased NT\$108,190 thousand.
 - (B) Remedy for Cash Deficit and Cash Flow Analysis for the coming year:

Unit: NT\$ in thousand

| Estimated Cash and Cash | Cash Flow | Estimated Cash Outflow (Inflow) (3) | | Cash Surplus | Leverage of Cash Surplus (Deficit) | | |
|------------------------------------|-------------------------------|--|--------------------------|---------------------|------------------------------------|--|--|
| Equivalents, Beginning of Year (1) | from Operating Activities (2) | | (Deficit) (1)+(2)-(3) | Investment Plans | Financing Plans | | |
| 9,849 | (70,000) | (350,000) | 29,849 | - | - | | |

Analysis of cash flow change for the coming year:

- 1. Operating activities: it is estimated that turnover, stock purchase and receivables will grow, causing net cash outflow in operating activities.
- 2. Investment activities: it is estimated that there are new investment plans and plants in the coming year, causing net cash outflow in investment activities.
- 3. Financial activities: amortization of partial long-term loan and repayment of short-term loan cause net cash outflow in financial activities.
 - (C) Improvement plan for illiquidity: since the Company's business is in profitable growth and turnover, stock purchase and receivables, required working capital are estimated to increase, it shall carry out the financing or increase financing amount according to plans.

VI. Impact of Major Capital Expenditure Items on Financial Business

(A) Entrust development contract

In order to develop new products, the director's meeting has approved to sign an entrusted development plan with CSM Maschinen GmbH. It is estimated that it will open a new door for science after the development, which will have a great help to revenue.

(B) Impact on financial business

The Company's debt ratio on December 31, 2015 is 42.03%, significantly decreased 6.27% compared to 48.30% on December 31, 2014, which shows the company's conservative and stable operation.

In order to expand operation scale and improve turnover, the director's meeting has approved to sign an entrusted development plan with CSM Maschinen GmbH to deal with the Company's future development. It has no major impact on the Company's financial business.

V. Main Causes for Profits or Losses, Improvement Plans and Investment Plans for the Coming Year

- (A) The Company's reinvestment policy shall focus on business-related field with an expectation to improve its overall operating performance. Relevant executive departments shall implement in accordance with internal control system "Investment Cycle" and "Acquisition or Disposition of Assets Handler"; stipulate "Subsidiary Management Approach" for internal control system to facilitate motoring each subsidiary to stipulate relevant operating procedure on major financial and business matters and establish subsidiary operating risk management system in accordance with laws to maximize the performance.
- (B) Main Causes for Profits or Losses, Improvement Plans and Investment Plans for the Coming Year:

| Description Item | 2015 profit or loss amount | Main reason of profit or loss | Improvement plans | investment plans for the coming year |
|--|----------------------------------|---|--|---|
| CHIEFTEK PRECISION HOLDING CO., LTD. | 1,726 | Chieftek Precision (Hong Kong) Co., Limited. and CHIEFTEK PRECISION USA CO., LTD. investment gains and losses | - | Depending on the operating conditions |

| CHIEFTEK PRECISION USA CO., LTD. | (60) | | Developing new business actively | Depending on the operating conditions |
| Chieftek Machinery (Kunshan) Co., Ltd. | 1,811 | Growth of turnover and accelerated destocking. | _ | Depending on the operating conditions |

Unit: NT\$ in thousand

VI. Analysis of Risk Management

- (A) Effects of Changes in Interest Rates, Foreign Exchange Rates and Inflation on Corporate Finance, and Future Response Measures:
 - 1. Interest rate:

The Company's 2015 and 2014 annual interest payment is NT\$17,997 thousand and NT\$19,369 thousand respectively, accounting for 1.76% and 1.90% of turnover respectively, so the change of interest rate will have no major impact on the Company. The Company has signed long-term and short-term financing contract (including

five-year join-loan contract) with multiple banks. Carefully monitor interest rate movements, adopt proper hedging strategies, and make use of capital markets financing instruments to ensure that our financing costs are at a comparatively low level.

2. Foreign exchange rates:

The Company's 2015 and 2014 net loss on currency exchange is NT\$3,427 thousand and net cash benefit is NT\$4,990 thousand accounting for(0.34%) and 0.49% of net sales respectively. Because the proportion of exchange gain or loss accounting for turnover is not high, the whole exchange rate has not been a major risk burden on profitability. While the Company's income of export sales is Dollar, Euro and Yen-based and the purchased currency is Euro and Yen-based, so part of assets and liabilities have natural hedging effect. The Company has a clear operating strategy and risk control procedure to respond to changes in the spot exchange rate, stays in close contact with financial institutions, and adjusts its foreign exchange strategy to minimize the risk of exchange rate accordingly.

3. Inflation:

The impact of inflation does not currently have a significant impact on the Company's profits and business operations in 2015 and 2014. Only the Company still continues to pay close attention to the economic environment and the volatility of the market environment can avoid the adverse impact of inflation and deflation.

- (B) Policies, Main Causes of Gain or Loss and Future Response Measures with Respect to High-risk, High-leveraged Investments, Lending or Endorsement Guarantees, and Derivatives Transactions:
 - 1. Policy, profit or loss reasons
 - (1) The Company did not engage in any high-risk or high-leveraged investments. The transactions and procedures related to lending and endorsement are based on the Company's "Procedures for Lending" and "Procedures for Endorsement Guarantee".
 - (2) The situation of the Company's loan to others in 2015, guaranty endorsement and the handling of derivatives transaction is as follows:
 - A. The handling situation of the loan to others is as follows:

Unit: NT\$ in thousand

| 0 | bjects of the loan | Financing | Maximum | | Maximum |
|---------------------------------------|---|--------------------------|---------------------------------|----------------|--------------------|
| Company name | Relation with company | limit to individual fund | balance of current period | Ending balance | limit of financing |
| cpc Europa GmbH | The Company adopts equity method to evaluate its invested company | 527,812 | 122,333 | 52,026 | 527,812 |
| cpc Europa GmbH | The Company adopts equity method to evaluate its invested company | 50,930 | 41,393 | 0 | 263,906 |
| Chieftek Machinery (Kunshan) Co., Ltd | Subsidiary adopts equity method to evaluate invested company | 96,062 | 47,475 | 0 | 527,812 |

B. The handling of guaranty endorsement is as follows:

Unit: NT\$ in thousand

| Objects of | | | | Net worth ratio of | | |
|---|---|--|-------------------------|--------------------------------------|---|--|
| Company name | Relationship with the Company | Guaranty endorseme nt quota to single enterprise | endorseme nt balance | endorseme nt balance at end of | accumulated guaranty endorsement amount accounting for the latest financial statement | Maximum limit of guaranty endorsement |
| | The Company adopts equity method to evaluate invested company | 659,766 | 108,062 | 46,644 | 4% | 659,766 |
| CHIEFTEK PRECISION HOLDING CO., LTD. | The Company adopts equity method to evaluate invested company | 659,766 | 47,475 | 0 | 0 | 659,766 |

C. Handling of derivatives transaction: None.

2. Future's Response Measures

For the loan to others, guaranty endorsement and derivatives transaction, in addition to carefully assessment and regularly report and monthly control, the handling shall be in accordance with "Guaranty Endorsement Operating Procedures", "Loans to Others Operating Procedures", "Derivatives Transaction Processing Program" and "Acquisition or Disposition of Assets Handler" approved by the Company's director meeting and shareholder's meeting.

(C) Future Research & Development Projects and Corresponding Budget:

In addition to actively promote the advantageous product miniature linear guide to improve market share, **cpc** is now developing towards DD motor, micro motor, driver and controller and so on. With the rapid development of Germany advanced mechanical technology, professional technical ability and applied industry 4.0, **cpc** is expected to increase the investment budget to more than NT\$70,000 thousand.

The Company has invested NT\$36,985 thousand of R&D in 2015, increasing NT\$6,210 thousand compared to NT\$30,775 thousand in 2014. The increase rate is 20.18%.

(D) Effects of and Response to Changes in Policies and Regulations Relating to Corporate Finance and Sales:

Although being impacted by the raise of US interest rate, deflation in Euro, the challenge of high unemployment rate, slowing economic growth in China mainland and other international uncertain factors in 2015, as well as domestic economic challenges, which include: join regional economic integration, push commodity's export energy, encourage domestic investment will, deepen the adjustment of industrial structure, enhance the growth of wages in real terms and improve the environment for innovation and entrepreneurship.

Although due to the characteristics of the industry, the Company is less affected by the regulatory environment, but the Company will continue to apply for a patent to protect the intellectual property to deal with the increasingly competitive international environment.

(E) Effects of and Response to Changes in Technology and the Industry Relating to Corporate Finance and Sales:

In response to the change in product demand, government and private sectors led by technological innovation have invested a lot of money to integrate the technology research so that the innovation area of linear transmission products can extend from intermediate equipment to humanoid robot and terminal consumer products. In addition to rely on internal team, R&D of large enterprises emphasizes more on the creation of external resources and market demand, therefore, the setup of R&D center and the selection of R&D strategy partner is more globalized. The Company will apply for a patent to protect each innovative concept and design and actively expand application field in the future market to cope with the change of technologies.

Bring forth the new through the old in terms of technology is a positive help for the Company's product to expand the application fields. Therefore, the Company will continue to develop R&D ability to realize the Company's sustainable operation concept by combining technology and industry's long-term development trend.

In terms of overall business environment, due to the downsizing of US quantitative easing scale and more change in exchange rate, the Company will continue to collect and analyze international situations. The Company will pay attention to the important changes in domestic and foreign policies and laws to reduce possible adverse effects in the future.

- (F) The Impact of Changes in Corporate Image on Corporate Risk Management, and the Company's Response Measures:
 - 1. Since its inception, the Company has consistently maintained an ethical business philosophy and fulfilled its social responsibilities. Aside from working to strengthen internal management and conforming to all relevant corporate governance requirements, the Company has also organized numerous public welfare activities.

- 2. The Company has good corporate image. There is no significant change in circumstances and cause crisis to the Company.
- (G) Expected Benefits from, Risks Relating to and Response to Merger and Acquisition Plans: The Company has no ongoing merger and acquisition activities. In considering future M&A activities, the Company will evaluate their efficiency, risks, vertical integration and other factors in accordance with its internal control system to guarantee the Company's interests and original shareholders' equities.
- (H) Expected Benefits from, Risks Relating to and Response to Factory Expansion Plans:

 Any expansion of the Company's facilities will be subject to careful evaluation by a special task force in accordance with the Company's internal control system to achieve the operational goal of sustainable management. Major capital expenditures shall report to director's meeting and be carefully executed. In terms of funds, in addition to convert the surplus to capital to enhance financial structure, the Company even works with banks to obtain adequate funding, but the Company shall have been fully considered the investment returns and possible risks.
- (I) Risks Relating to and Response to Excessive Concentration of Purchasing Sources and Excessive Customer Concentration:

1. Purchase

Based on industry's characteristics, quality rate, delivery and market supply and demand, the Company purchases most miniature linear guides and slide cold drawing steel from Company A (Taiwan is the main production base for the Company, so the main stock manufacture of the combined company shall be same with the parent company's). This manufacture is a world leading manufacture in cold drawing piece production, whose product quality is good. The Company has established cooperative relationship with it since the beginning and the long-term relationship is good. In order to maintain the elasticity with the supplier, the Company has not signed a long-term supply contract with Company A. And in order to avoid a shortage of materials and uncontrollable cost risk caused by a single supplier, in addition to maintain a good cooperative relationship with Company A, the Company is also actively seeking a new supplier to reduce the stock concentration. The purchase proportion from Company A has been reduced year by year since 2009 and the situation of stock concentration has been improved. The risk is limited.

2. Sales

Main products of the Company are miniature linear guide, standard linear guide and linear motor. The biggest trade debtor in 2015 is the subsidiary CHIEFTEK PRECISION (Kunshan) with 100% stake, which is accounting for 28.35% of annual net sales. Main business scope of CHIEFTEK PRECISION (Kunshan) is to sell the products produced by the Company and provide after-sales service for mainland customers, so it is not a single customer. As for the combine company, there has no customer that accounting for 10% of annual net sales. The Company will continue to develop new products and customers in the future and it is expected that there will have no circumstances that will affect normal operation due to concentrated sales.

- (J) Effects of, Risks Relating to and Response to Large Share Transfers or Changes in Shareholdings by Directors, Supervisors, or Shareholders with Shareholdings of over 10%:

 The shareholdings of the Company's directors and supervisors have been stable during the last few years, and there have been no major transfers or swaps of shares.

- ${\rm I\hspace{-.1em}I}$. By the printing deadline of the latest annual report, the handling situation of private securities is: None.
- III. By the printing deadline of the latest annual report, the Company's stock held or disposed by subsidiary is: None.
- IV. Other necessary supplementary instruction:

Commitment issues that the Company applying counter transaction to Securities and Futures Trading Center of ROC and its implementation:

| No | Commitment issues | Implementation |
|----|--|--|
| 1 | The Company has committed that Securities and Futures Trading Center of ROC (refer as: Taipei Exchange) shall participate in the evaluation of company's management system in two years after OTC listing. The evaluation result shall be reported in the shareholder's meeting; and the stipulation of relevant internal control and internal system shall refer to "Listed and OTC Company Governance Code of Practice". | The commitment has been eliminated in accordance with Taipei Exchange No. 1030200482 on 2014 June, 23. |
| 2 | The Company has committed to not to give up increasing capital to cpc Europa GmbH, CHIEFTEK PRECISIONHOLDING CO., LTD. (hereafter referred as CHIEFTEK PRECISION HOLDING) in the future when revising "Acquisition or Disposition of Assets Handler"; CHIEFTEK PRECISION Hong Kong shall not give up increasing capital to the Company or disposing the Company's equity unless obtaining the approval of CHIEFTEK PRECISION CO., LTD. Director's meeting in the future. If the handling method is to be revised in the future, CHIEFTEK PRECISION Hong Kong shall input it in the public information observation station and report to OTC listing for reference. | Has been implemented according to the commitments. |
| 3 | The Company has committed that Securities and Futures Trading Center of ROC (refer as: Taipei Exchange) shall entrust the accountant or institute designated by OTC listing through the Company to carry out external professional audit in accordance with the audit scope designated by the OTC listing. The audit result shall be submitted to OTC listing and the Company will be responsible for relevant costs. | Has been implemented according to the commitments. |
| 4 | As the Company's profit before tax in the first three quarters of 2012 has significantly decreased compared to the same period last year, the Company and the recommended securities firm will fully consider the performance change when discussing the offering price. | Has been implemented according to the commitments. |

The violation of the commitments will result in the applicant company in this case (it is an OTC company when the commitments are violated) subject to "Securities Trading Business Rules" Article 12, Paragraph 1, Item 7 and the center shall report to competent authority to stop its securities OTC trading.

The commitment issues will come into effect after the undertaking is issued. Except it is fulfilled, or the term is expired, or the conditions are terminated, its force will continue to be effective during the period of OTC listing. The promised made by the applicant company will not be affected by the change of applicant company's name or operating class. When the operating class is changing, the non-eliminated promises shall be listed in the handover matters. For the promises made by the applicant company's director, supervisor, shareholders or specific person, the applicant company is responsible for the broken promises. They shall promise it will not have any impact due to the change of personal name or personal status. If the change of status is in the promise list, then it is not subject to the limit.

IX. By the printing deadline of the latest annual report, the matters that prescribed in Securities Exchange Act Article 36, Paragraph 3, Item 2 that have great impact on shareholder's equity or security price are: None.
